

2.7.1 - Student Satisfaction Survey (SSS) on overall institutional performance

Department
641 responses

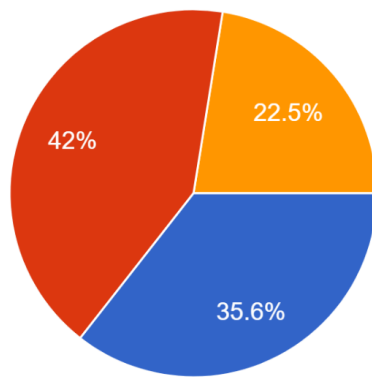

What degree program are you pursuing now ?
641 responses

Semester

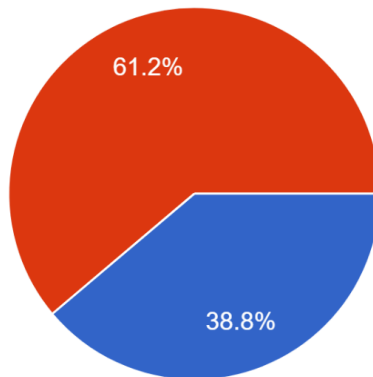

641 responses

- I
- III
- V

Gender

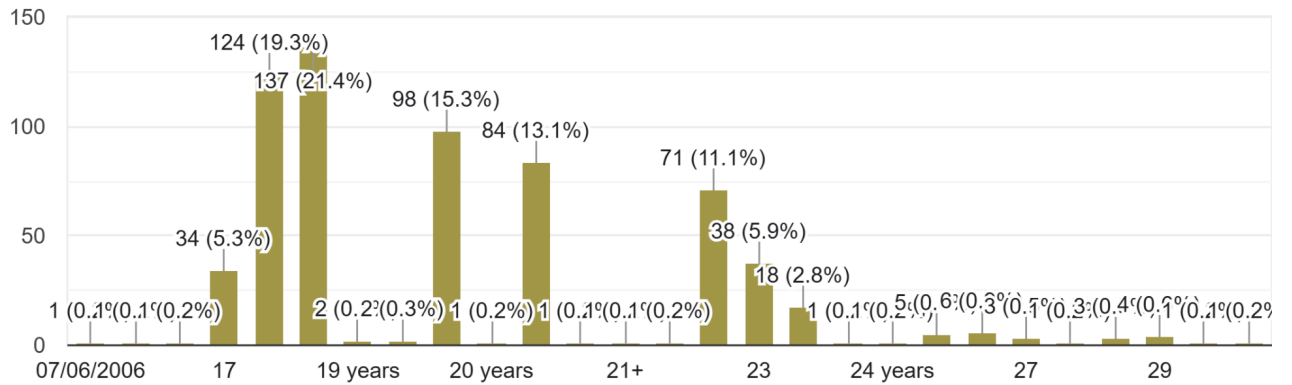

641 responses

- Male
- Female
- Transgender

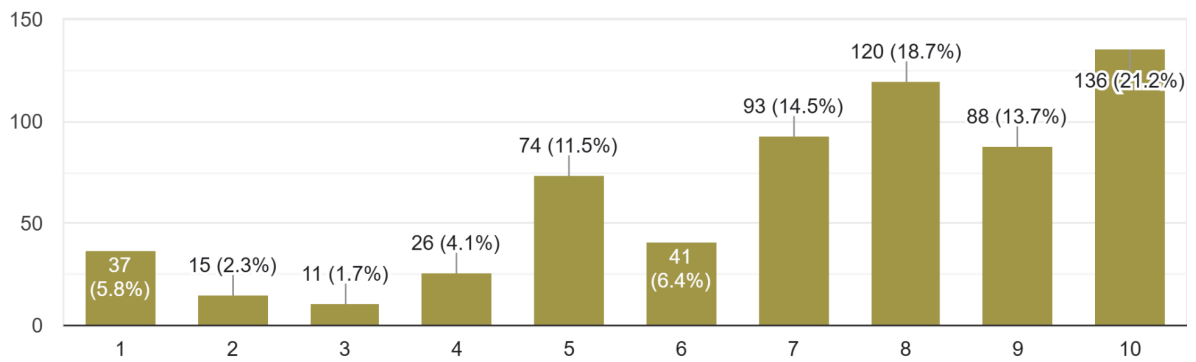

Age

641 responses

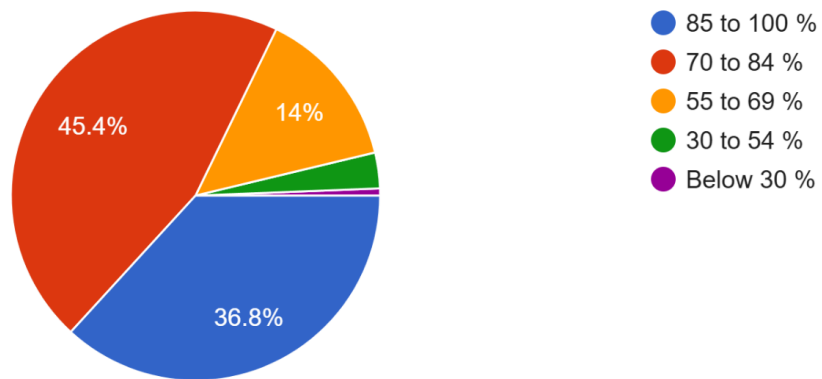

How is your overall experience of studying in DSVV ?

641 responses

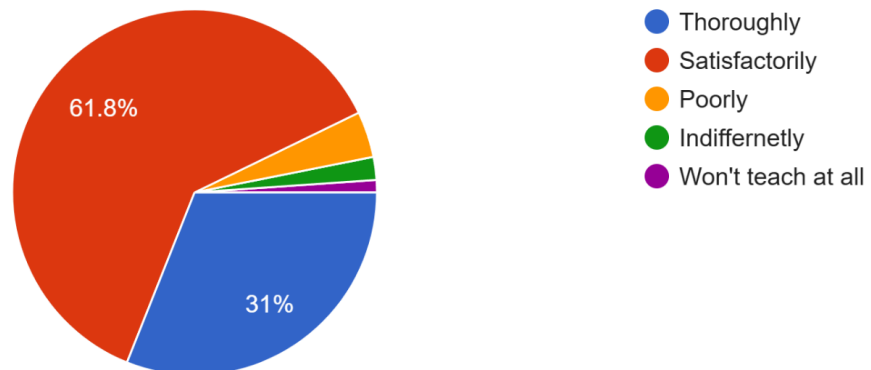

How much of the syllabus was covered in the class ?

641 responses

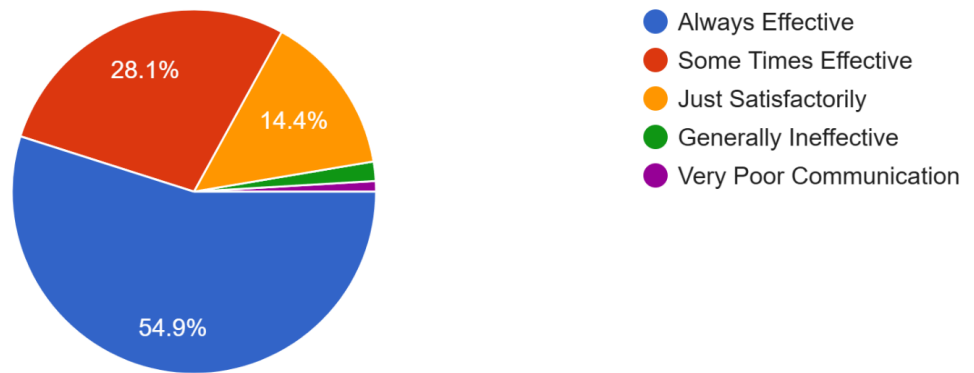

How well did the teachers prepare for the classes ?

641 responses

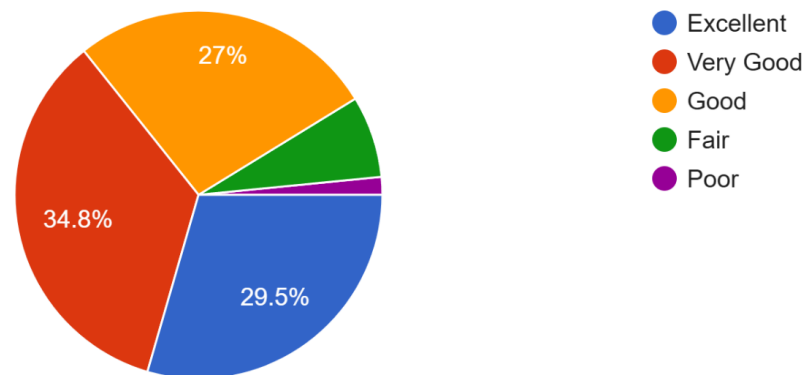

How well were the teachers able to communicate ?

641 responses

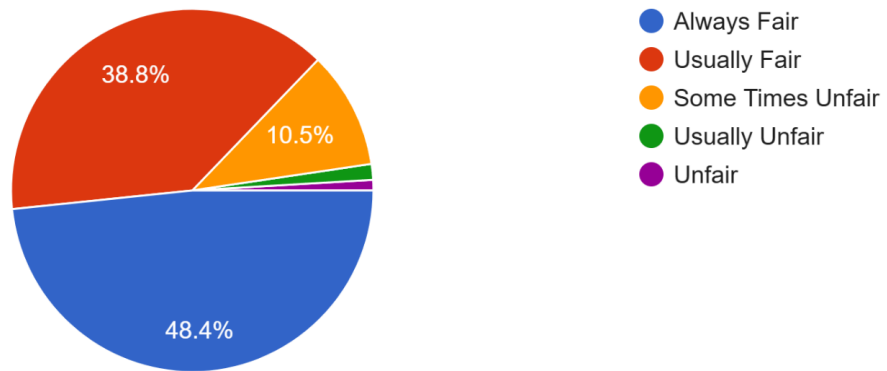

The teachers approach to teaching can best be described as

641 responses

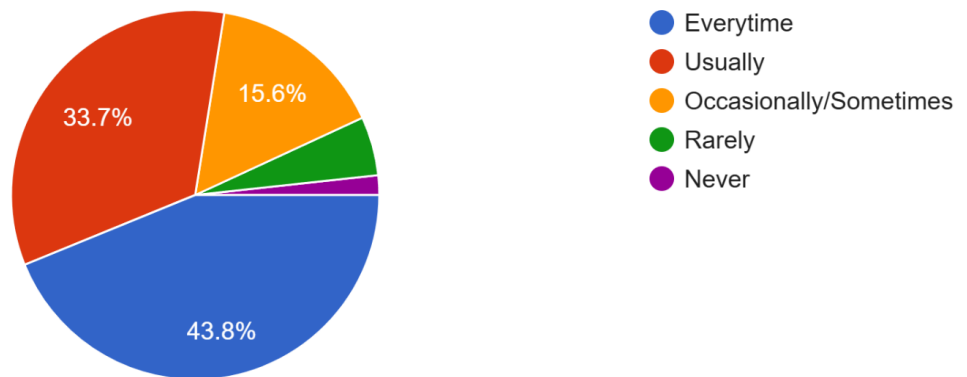

Fairness of the internal evaluation process by the teachers

641 responses

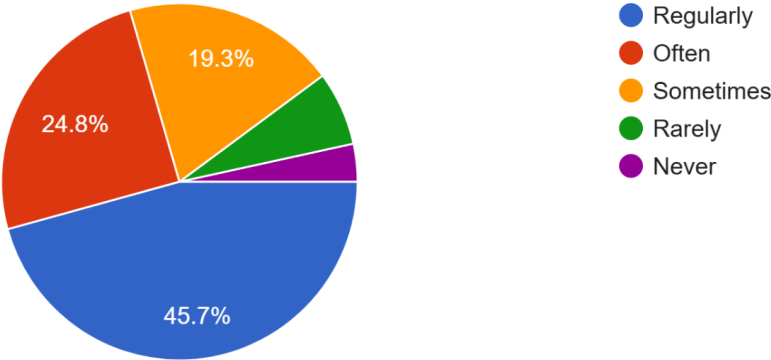

Was your performance in assignments discussed with you ?

641 responses

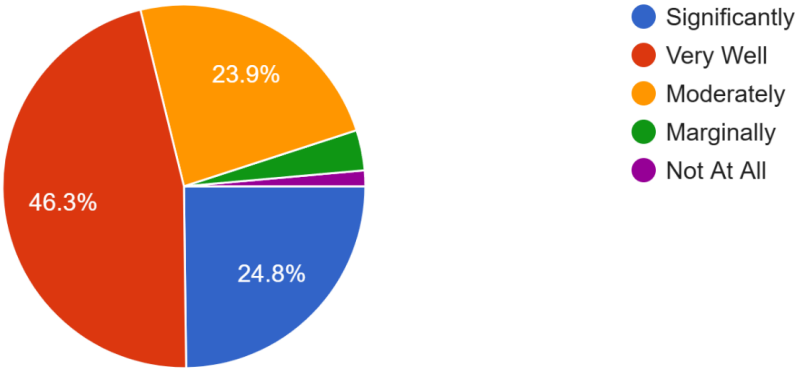

The Institute take active interest in promoting internship, student exchange, field visit opportunities for students

641 responses

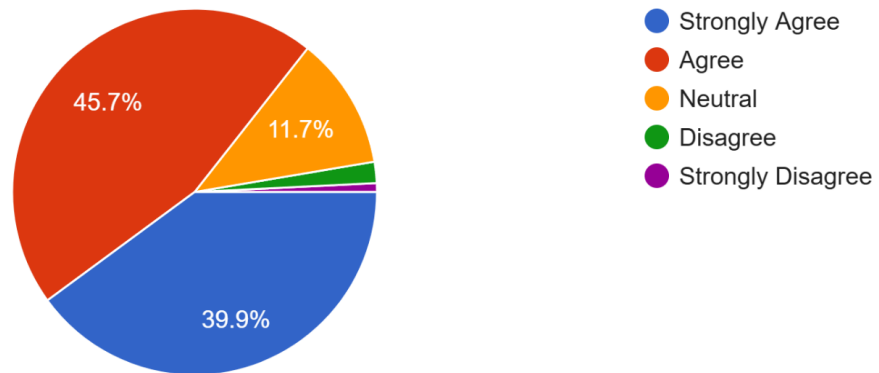

The teaching and mentoring process in your institution facilitates you in cognitive, social and emotional growth

641 responses

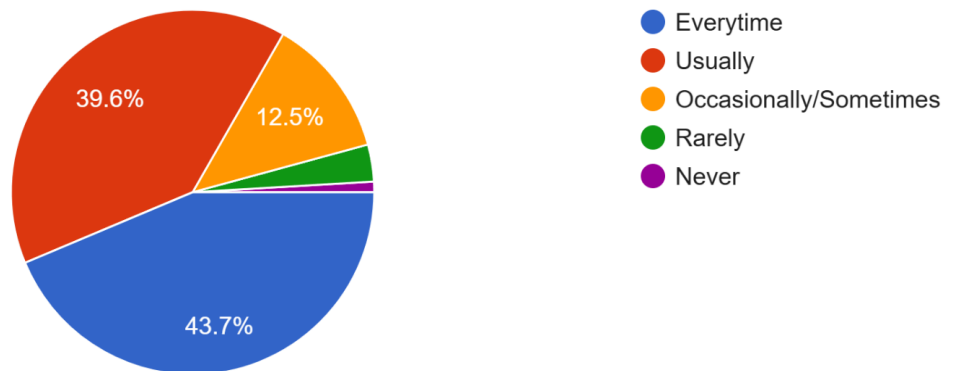

The institution provides multiple opportunities to learn and grow

641 responses

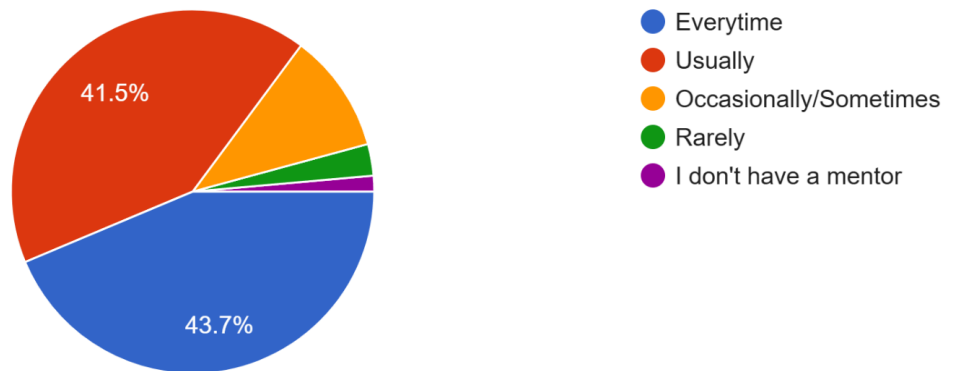

Teachers inform you about your expected competencies, course outcomes and program outcomes

641 responses

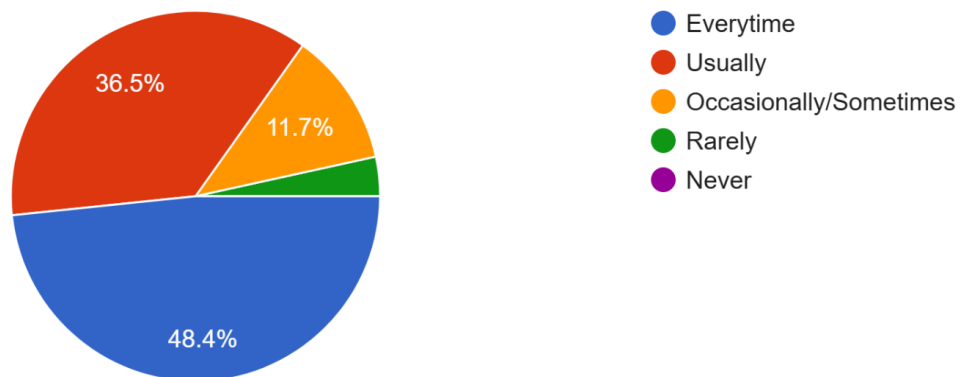

Your mentor does a necessary follow up with an assigned task to you.

641 responses

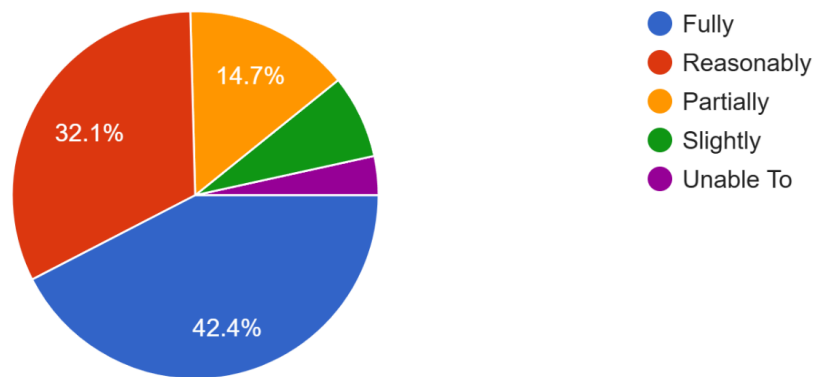

The teacher illustrate the concept through examples and applications.

641 responses

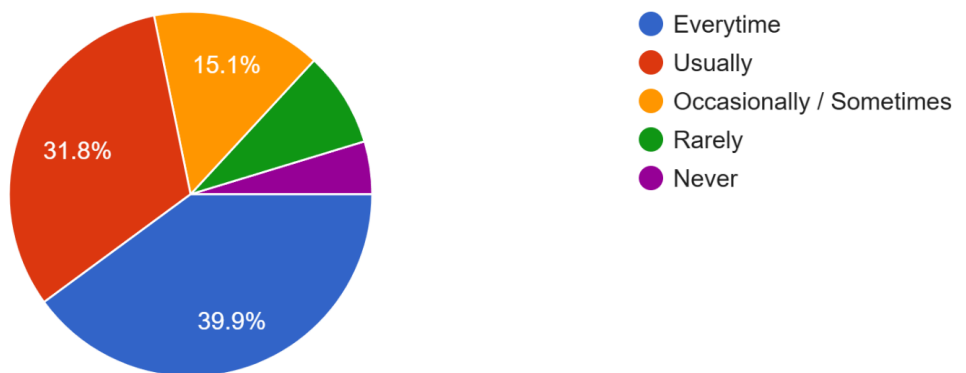

The teachers identify your strengths and encourage you with providing right level of challenges

641 responses

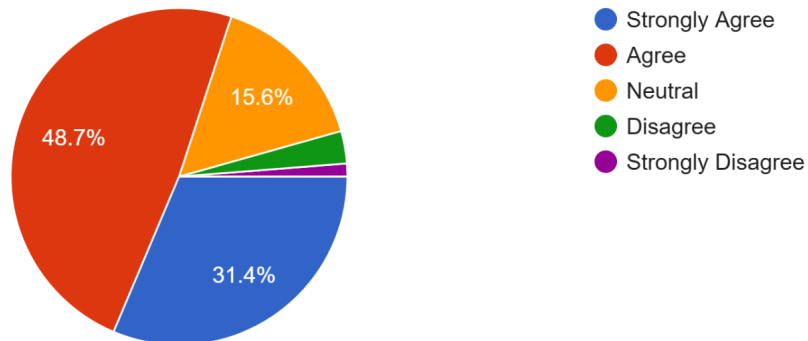

Teachers are able to identify your weakness and help you to overcome them

641 responses

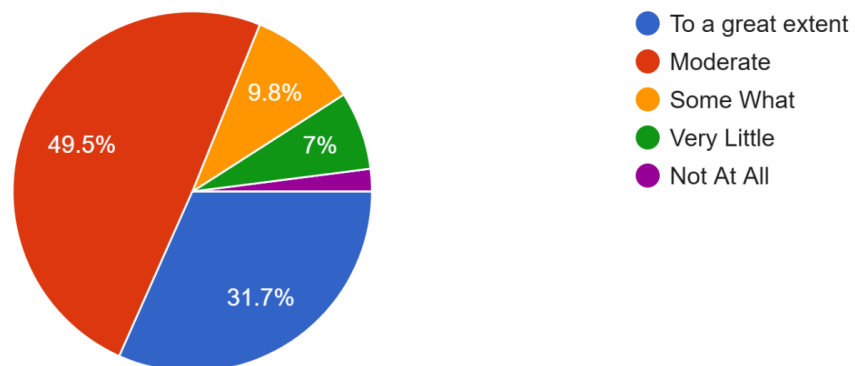

The Institution makes effort to engage students in the monitoring, review and continuous quality improvement of the teaching learning process

641 responses

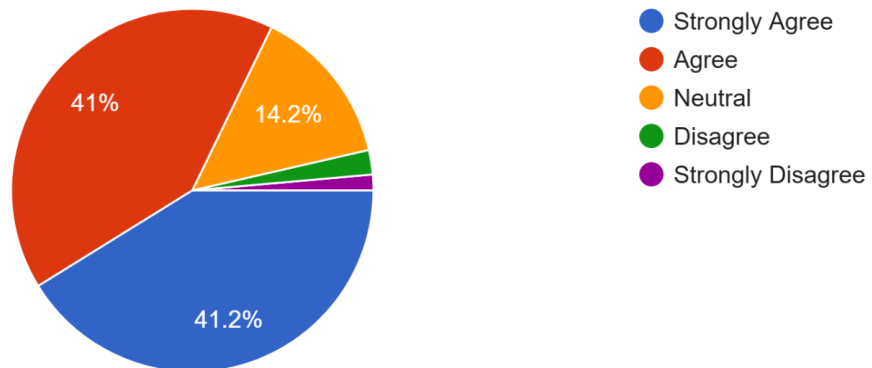

The institute/teachers use student-centric methods, such as experiential learning, participative learning and problem solving methodologies for enhancing learning experience

641 responses

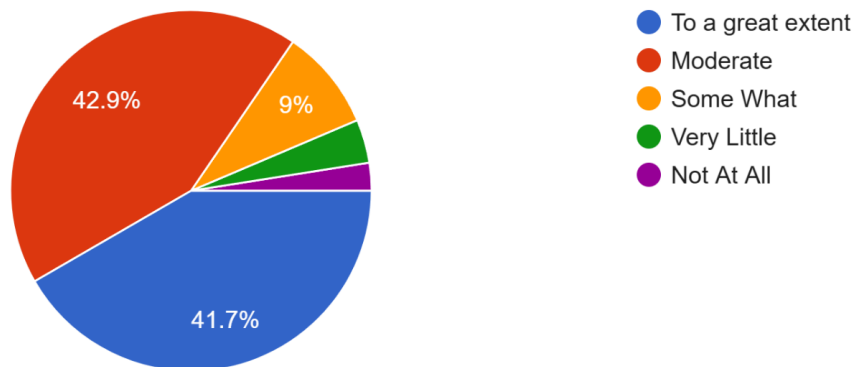

Teachers encourage you to participate in extra curricular activities

641 responses

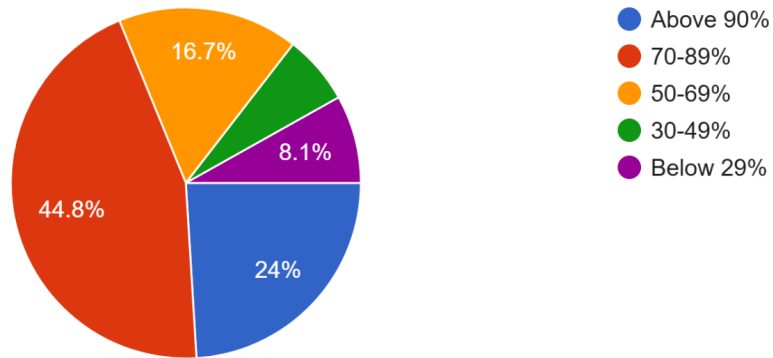

Efforts are made by institute/teachers to inculcate soft skills/life skills and employ ability skills to make you ready for the world of work

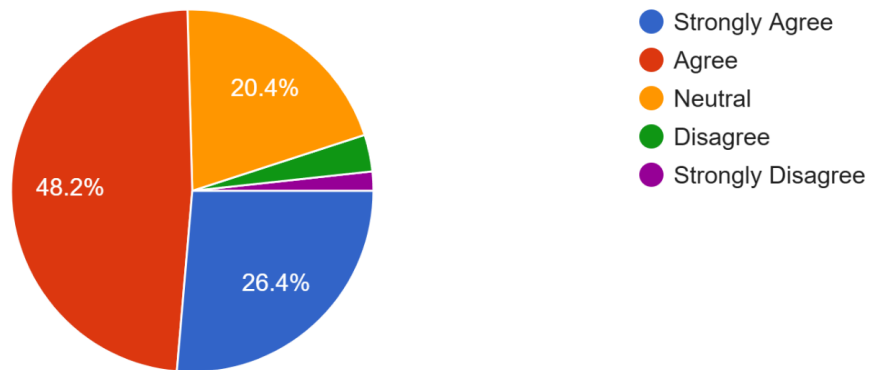

641 responses

What percentage of teachers use ICT Tools such as LCD Projectors, Multimedia etc. while teaching
641 responses

The overall quality of teaching learning process in your institute is very good
641 responses

Give three observations / suggestions to improve the overall teaching - learning experience in your institute

Extra actives should promote
Educational tour should be increased

All over good need a pratical work

Help the students to know the weakness and help to improve it

हम अपने संस्थान में समय अधिगम अनुभव से पूरी तरह से सहमत हूँ।

- 1.take proper classes (to students)
- 2.Participating other activities
- 3.Be spiritual

I am fully agree with the institute education system university help us for overall development

Ham is model se Puri tarah se santusht hun

To attend the all classes

I'm satisfied

Example dekar samjhaye
बच्चों का स्तर देखकर पढ़ाए
अध्यापक खुद अपना अनुभव बढ़ाए

संगीत विभाग में तबला वादक संगत कर होना चाहिए जिसे हमारी ताल की पकड़ अच्छे हो सके

- 1.teachers are use to help the students in their weak points
2. Teacher not to do that encourage only those who are good but who are at low also help them to do best

Continue addition to syllabus to keep up with corresponding industries. The optional courses should have more diverse and practical subjects.

The faculty should be encouraged to take responsibility while the students participate and learn through extracurricular activities and excursion activities should be added

More communication, interaction and understanding between students

Helps the students to do more than syllabus
Enhance the students skills performance
Give not only books knowledge but the factual things of life

Give students opportunity to show the talents

This was unique and very good for us 99.9%

This was very nice for us

Nothing

1. Increasing the number of professors in departments.
2. Syllabus should be completed on time.
- 3.To motivate students to participate in co-curricular activities.

Don't judge those student who are not able to do best in other activity with those student who are best in every activity

Practically
Well explanation
Provide notes

Promote The Experience-based Learning , Use Digital Game-based Learning .

I would like to suggest that there should be more practical classes.

By student not compulsory to take all classes

2nd only core paper or core sub classes compulsory to take

3rd only favourite sub choose by student take compulsory classes and by teachers guide to students

पढ़ाना कठिन है! चाहे आप प्रथम वर्ष के शिक्षक हों या अनुभवी शिक्षक, इस पेशे में बहुत सी चुनौतियाँ हैं। लेकिन इसमें बहुत से पुरस्कार भी हैं। अगर आप निराश महसूस करने वाले शिक्षक हैं या किसी शिक्षक के मित्र हैं तो पढ़ते रहिए क्योंकि यह पोस्ट आपके लिए है। हालाँकि मैं आपकी वर्तमान परिस्थितियों को बदलने में सक्षम नहीं हो सकता, लेकिन मुझे उम्मीद है कि शिक्षकों के लिए यह प्रोत्साहन थोड़ा मददगार साबित होगा।

Good

Sare sir mam achche h

Nothing...

Food ,

Teachers are good and their communication was also good and they help us in study problems and they gave us suggestions and help us .

Practical things , equal opportunities,

regular class

give dates early

Very well

Upgradation of PCs is needed.

Improve the quality of teachers.

Focus on practical Internships.

On campus placement is missing improve it.

Department me teachers ki sankhya bada di jaye aur hostel ki suvidhao pr dhyan diya jaye

Faculty

Scholarship system should be made available to poor children, whether it is for professional or non-professional courses.

✓ Ppt से पढ़ाया जाए ।

✓ कोई एक ही शिक्षक एक subject को पढ़ाए।

✓ Assignment पहलेसे ही दिए जाए ताकि हम exam कि तैयारी कर सकें ।

Some of the teacher doesn't start from basics

Replacement of PC's in BIT LAB

Everything is fine

Good and enhanced learning skills and techniques for better studies

Education par kam attendance pr jyada dhyan diya jaata hai bss yahi major issue hai

Teachers can improve their communication skill ,provide professor not scholars to us .

Professional teachers should provide instad of scholars

Improvement in practical classes

Auditorium management is very poor so I don't like to go there due to so much heat there and suffocation even the guest are usually full of sweat .

1. Interactive and Engaging Teaching Methods
2. Personalized Learning
3. Focus on Practical Application

It's not very bad but it's for me is best.

- 1) If students are assessed by exam marks, teachers should guide them on exam strategies. Otherwise, teaching should focus on deeper understanding with data, facts, and reports.
- 2) Students need time to practice skills and research what they've learned in class to prepare for the professional world.
- 3) Teachers should stay informed about the latest trends, events, and technologies in their field, going beyond just teaching theory that students can access online.

Teachers should have proper schedule of classes according to the time and table

I don't have an answer to this

Digitally courses should be provided with more industrial knowledge then theoretical knowledge.

As much as I have observed in this 2-3 years,

The institution and timetable sometimes feels like school, and generally students get tired and frustrated easily (I personally have experienced this)

As students live alone without parents, it's the responsibility of Teachers and Wardens to guide students towards right path and help them not only academically but emotionally, because This is the University With A difference and the main reason many students and parents approach this university is it's environment and spiritual Background.

At the beginning teachers recognise the one who are good, and give them chances.

I have always been an opportunity seeker and got many opportunities of learning Lithuanian and other such skills. But I have few friends who are not aware , so teachers and faculty should focus more on students who tend to lose interest rather than focusing on people who are good and willing to work.

Nice

1. My suggestion is that the teacher should explain with more examples so that we can understand better
2. Is that the teacher should give us some experience of internship or explain a little what is it
3. Teacher gave best suggestion and relate with us

Teacher should give priority to individual who lack in studies. Talk regularly about thier growth and difficulties faced by them.

everything is going well

- 1.need improvement in lab and technical things like computer systems and all
2. bca 3rd sem student are not allowed to come in bca lab

Needs more experience and talented faculties
Need more concerned in student

Discrimination should be prohibited by the teachers

They should better in classrooms, also be better in behaviour and give more opportunities of paid internships.

Experience and knowledge is very important part of all teacher then communication.

Please focus on the management.

Provide smart class

Make practical learning, visit sites at least online mode Like projector documentry, overall please provide intership according subjects and intresting skills, increase high thinker faculties who provide next level knowledge like chinamya sir , not provide knowledge of book line to line

Focuses on Practical education, use different activities, quality of content, visit historical places

PhD scholars should not teach

No social intership,please give holiday list and program conducted in dsvv like coming of ministers at least 5 dsys before the program

- 1.PhD scholars can't take our classes properly but some scholars take our classes very well.
- 2.There should be increment in the use of multimedia
- 3.Yoga class should be taken with instruments and anatomical reviews.

Very poor

- 1 Quality of syllabus Increase Karni chahiye
- 2 Attendance me Focus na karke, Quality learning me Focus karna chahiye
- 3 Class ki Duration 1 hour se change karke 3-4 Hours ki honi chahiye (In Weekly) Daily Period wise classes (Like School) Ki tarah nahi hona chahiye
- Chahe weak me ek subject ki 2-3 clases hi ho but duration Jyada hona chahiye
- 4 Major Par Jyada Focus karne ke liye Promote karna chahiye

1. Improve quality of teachers (provide professors for teaching)
2. Improve the practice method for yog practical class (focus on skill enhancement not on syllabus)

Yog practical classes ko aur better kiya jaye

Yoga practice facilities, yoga equipments

- 1) Experienced teachers (PhD doesn't equal to experience)
- 2) Fluency in both English and Hindi (Most teachers are teaching in Hindi and English students are neglected)
- 3) The morning yoga pratical class should be taught by professionals and experienced teachers

Change all the pc's in BIT lab

1. All the coarse that have future in coporate sector should be provided with more practical knowledge than theoretical knowledge.
2. Attending or participating should not be made compulsory. Insted, students should ve told about it's importance so they themselves join in.
3. Next, I think government has taken a good step by creating the 'New Education Policy' to provide the students with multiple opportunities in future.

Improve in quality and numbers of faculty

Teaching method improve little. NEP students face many problems so just improve

Teaching method improve little, NEP students face many problems due to more classes so please improve it

Overall in good. And all teacher should support us.

The children who have come from Hindi medium should improve their studies a little.

Everything is fine

1. Teaching should be done in bilingual language. Also notes should be provided in English, so that students can easily learn..!

2. The overall teaching-learning process is Satisfactory.

Teacher should also use some English words to engage with students

Regarding this, I would just like to say that give some freedom to the children

Overall teachers are all good but I want to suggest that the teachers should interact with students a little bit more

The overall is very good

Interactive teaching methods

Use of technology

Feedback and assignments

Study without pressure

Everything is best and Teacher learning experience is good

1. Lab could be improved, in terms of computer system (lag or hang problem during working with)

2. Students should be notified when teachers are not able to take class, or with any other issues.

3. Due to NEP we have experiencing high challenges to do assignments, which create too much load of different subjects,

Subject should be removed except LM, MAJOR and MINOR.

Class on projector

Good

.

1. Hostel management

2. Class timing (you should increase the no. of teachers)

3. Proper coach for sports (help the student of other states)

1) need to correlate with real life examples to the topics. So students can understand easily.

2) need to improve teaching quality

3) need to improve interaction between teachers and students during class. So students always be connected with class.

Class should be through projector .

1. PhD scholars should not take class.

2. Giving extra time to study other than extra things .

3 . Yoga practical class environment is necessary to change.

All teachers are good I'm not saying they are not teaching well but ya 1st thing use both language hindi-English while teaching , 2 nd thing use projector for showing videos related to the topics. Because we adapt more while watching more than listening, 3rd point is we only want our teachers to support us not to demotivate us . Thank you .

After coming I am feeling change in my self

And change my daily routine

1. Practical Project-Based Learning.
2. Upgrade Lab Infrastructure and Tools.
3. Mentorship and Industry Interaction.

All Teachers Support As..

1. Messa me bartan dhone ki vyavastha thik kre
2. medical facility sahi provide kre
3. musical tour karvaya jay

Nothing... I have no idea

1. Experienced teacher come for other universities, 2. student teach from professional internship 3. student teach in class demo for her/his future good Experience

teacher should take students seriour

All good

As per me there is a great requirement for practical experience and field visit more frequently and the process for this should me made less complicated than what is presently.

1. Include more and more field visits and make the process less complicated than what it is presently.

1. Practical exposure in the field work.
2. Class can be more interactive if teachers teach in more friendly way.
3. More and more workshops and conference can be there.

Everything is good

Make it practical more than theoretical on ground experience should be included, also make it limited to education don't make it to personal interference and make outer world to interact don't make quarantine

Increase mess timing & change in outing time

Good

Very good

1. I feel that if the teacher can rebuke it while reading it then the children will understand it better
2. use projector as much as possible so that it becomes easier for the child to understand
3. The teacher should be as friendly as possible with the children so that they does not hesited in asking even a little such relationship should be there

1. Main suggestion is that the teacher should explain with more examples so that we can understand better

2. Is that the teacher should give us some experience of internship or explain a little what is it
3. Teacher gave best suggestion and relate with us

No one

1. Give More encouragement to the student
2. Set some free time for the M
3. Everything else is good

- 01 The teacher should understand properly
- 02 Teacher should understand through example
- 03 The teacher should ask the children from time to time whether they are understanding or not.

Here are three observations and suggestions to improve the overall teaching-learning experience at DSVV:

Enhanced Use of Technology in Learning: While DSVV emphasizes traditional wisdom, integrating more advanced digital tools like e-learning platforms, virtual labs, and interactive content can enrich the learning experience. A blended approach combining modern technology with spiritual teachings would make education more accessible and engaging for students, especially in remote learning scenarios.

Greater Industry and Research Exposure: Offering more collaborations with industries, research institutions, and global academic programs can enhance practical knowledge and career opportunities for students. This could include internships, research projects, and guest lectures from diverse fields, beyond the spiritual and cultural focus, to give students a well-rounded skill set.

Personalized Learning Paths: Implementing a more flexible curriculum that allows students to choose from a wider range of electives based on their individual interests could help cater to diverse aspirations. Mentorship programs and personalized feedback systems would also enhance student engagement and academic success by addressing specific strengths and areas of improvement.

More Qualified Teacher
Placement cell required
Professional internship in each sem

I think University must bring placement and professional intership for computer science department for upcoming technical future of vs department

Are univercity should keep well qualified teacher and faculty
They should provide professional internship
The system are not good for the working

Including professional internship

may be the time management and convey of information .
sports feild interest of student .
some advanced technical inhancment in courses specially in CS depatment.

They have to give intership to student.

Everything is fine

Discrimination should be prohibited by the teachers.
Should understand the students learning speed and should not burden them.

Best experience in dsvv

Good

भोजन स्वच्छ, कभी कभी कीड़े होते हैं

Everything is quite good.
Classes should be end approx 3pm and may start from 8am

1. Real-world projects for practical learning.
2. Industry workshops to stay updated with trends.
3. Upgraded labs for advanced tech exposure.

Focusing on individual student should be done.

Provide sufficient staffs and facilities to the department

1lab for 1 program students
Increase no. of faculty members
Don't give too much assignments

Internship should be provided.

More experienced teacher needed, overall coordinator to insure feasible study where one can register there problem, syllabus emprovement

Focus on practical knowledge , real life problems

1. Use White board
2. Avoid PPT, Projector
3. Don't use Regularly website like W3school,Javatpoint Use always book

Topic should be taught in detail.

Explain topic in detail

- 1.Technology usage
2. Feedback
3. Leadership

Sab se sahemat hu

No suggestions

Very good

- 1.assigned the teachers for perticular subject
2. To use the presentations and practical method for teaching
3. Know about the student's interest field and provide him officially.

1. Practical Session, 2. Give teachers to the department, 3. Have a revision before starting the class

Use of smart board,life based teaching from syllabus ,practical of knowledge

Syllabus should be completed timely
After that assignments and presentations should be submitted

1. Teach with ppt
2. Improve the quality of computer
3. Dobut clear classes one day in 2 weeks

Better monitoring, Institutional resources enhancements ,more skilled teachers

It's already good.

Take feedback from students about teacher
This is a major thing which should be done .

In major subject not focus perfectly due to NEP. NEP ke wijye se major subject me bhut piche hu.. NEP me kuch sudar krna chiye ye baat kewal student he smj sakte jb ek sath sbhi subject ka assignment, ppt, internal bhut dikkt hota hai major subject pr jada dhyan dena chiye NEP me

- including professional internship opportunities
- educational tours
- involvement with other university students to get an idea about our worth.

Focusing on skill development which requires in digital world. If teacher is not available then they should inform these earlier that the class will be off , which leads to save the time of student.

NO NEED FOR SUGGESTIONS IT ALREADY GOOD

None

Teachers should interact with the students when they are less focused and try to figure out the problem faced by them on regular basis

Learning other languages

Learning some new skills

Identify more about students weakness and support them, explain with more examples on topic, explain the topic more in Hindi and English language.

Nothing ..

1. Teachers should ask about students mental problem.

2. Teachers should not only focus on toppers of class they should also focus on backbenchers and teach fairly in class.

3. By the perspective of institute , should provide breakfast to students because breakfast and nutrition is very important for student health.

1. Giving exposure to field (a 2-3 day visit to companies related to our field and having an experience there would improve teaching learning experiences) As a journalism student I get many field exposures like professional internship at every sem end and we also work for our youtube channel which is a unique way to give exposure to students but some departments like psychology, mathematics and hindi also need to do these kind of activities. It will help students get an idea how they need to work in field and they will also get an idea what kind of career they can choose.

Kuch teacher kuch subject achhe se padha pate

Communication skill, behaviour, don't do personal life interfering

Good

Practically teaching, Interactive class, Conference.

1) Improvement in english language

2) increase mess timing

3) Sunday outing timing should be changed (morning to evening)

Nothing, everything is good

Very nice

1. Teacher should take more real time examples to explain concepts.

2. Time cannot be manageable due to major and minor subjects both have many tasks to do everyday.

3. Should allow us to explore every opportunity in our field (it's a suggestion)

Not much

Great

Everything is going well and it's my suggestion that for our betterment we want guest lecture session

improving of computer devices

daily classes,

Weldone

Teach with real life use of technology and applications.

Teachers here teach very well, but along with studies, there should be some extra practical in what they are teaching and there should be some fun so that students enjoy studying

Good

Suggestion - From the project by Digital Classes

- 1.Include online tools, videos, and virtual labs to enhance lessons.
- 2.Conduct regular quizzes to track progress
- 3.Relate concepts to real-life scenarios to make topics easier to understand.

Good

Provide sufficient teaching staff
Provide sufficient class room to the department

1शिक्षकों की नियुक्ति।

Lack of professional professors.

We need more faculties.
Sometimes our daily life is too hectic cause all classes.
I felt that after taking admission here I just found many changes in my daily life means yes it was really a best decision to study here

Very good

- 1.Upgrade lab computers
- 2.BCA3rd sem students are not allowed in Bca lab

I think it's best university for learning so I have no suggestions.

Teachers should express themselves about what are they expecting from students , some selective teachers should be more flexible, psychology department should provide internships atleast once in 3 years and they should take us to trips

Improve teacher students contact

Evening extra practice
Teaching class once a week

1- Syllabus ke alawa aur alag chizo ko bata sakte h

This institution is very good ..

1. Appoint experienced teacher.
2. There should be assesment at every month end .
3. For making teaching effective use teaching tools .

- 1) Yoga class should be done with yoga instruments.
- 2) More use of gadgets for effective teaching/learning.
- 3) Educational tours, so that students can learn more about cultural.

After coming here I just found many changes in my daily life

- 1-Students ki galti batayen aur usme kaise behtar kar sakte hain
- 2- job aur career oriented padhai ho uske baare me batayen

Good

- 1). Limited assignments, pages quantity can increase number of assignment should be only one.
- 2).semester should be little bit longer.
- 3).Program should not be performed during the timing of classes.

Focus on Practical Application and Skill Development

Traditional lectures can become monotonous. Incorporating interactive methods like group discussions, case studies, and real-life applications can engage students better.

1.practical should increase

2.student should get marks through attentive in class not through projects and ppt

1) betterment in English language and more English lecture

2) increase mess time

Promote Collaboration and Teamwork,Celebrate Student Success and Stay Updated on Educational Trends

Teachers can use different type of study methods for make the class interesting and there should be a educational tour for students

गणित जैसे अन्य डिपार्टमेंट में भी प्रतियोगिताएं होती रहनी चाहिए।
कक्षा में उचित रूप से शिक्षकों द्वारा बच्चों से विशेष संवाद करना चाहिए।
पूरी तरह से ऑफलाइन क्लासेस होनी चाहिए।

Technology Integration,Student-Centric Approach, Alumni network and mentorship programs

Nothing

To improve the overall learning experience at DSVV:Increase practical and project-based learning to help students solve real-world problems.Organize industry-academic collaborations through seminars and workshops to enhance employment opportunities.Provide better access to digital resources so that students can become technically empowered and learn more effectively.

Jitna ho sake utna practically aur video ke madhyam se bacho ko samjhane ka prayatn kare

1- जयदातार व्यावहारिक के मध्यम से अध्ययन कराया जाय |

2- योग की कक्षाओं को नियमित लगाय और भाग लेना अनिवार्य करे|

3- इंग्लिश की क्लासेज शुरू करे|

placement ki Suvidha De

I had a good experience

The LM classess should be more practical to bind our intrest more in it.

Faculty should be more responsible for circulating information.

everything else is good it's just need a little more efforts of students and teachers both

Enhance personalize learning method and change bit lab computer basically processer are working poorly .

DETAILED Explanation in some classes

1. Need experienced teachers

2. Opportunities are great here

Teachers should give effective example and revise things for some time and give more ways to learn things

They should improve their teaching skills

Teaching is very hard but कोशिश करने से सब होगा 😊

There should be a good English teacher in the B.Ed. department who can deal with the children properly and make them understand and then teach them.

1. The projector should be used to explain to students.
2. Explain any topic by giving examples.
3. Do not put load on students with any assignment or other activities. Thank you

I am satisfied..

Mess food,

Major subject I think time given more in the comparison of Minor subject And don't be the overload subject syllabus of the course and try to new initiatives for learning. Give some reliable rule for students don't be overrestricted

1. Most of the time extra circular activities and departmental classes are clashing
2. Give exposure for a field visit to improve our practical work
3. some teachers need to focus on every student equally

No Suggestion

It's good

Teachers are understanding

They put their efforts on students

1. Time should be given for self studying.
2. Practical learning impact in our overall learning.
3. Teachers should teach with examples.

1. The department is promoting practical knowledge but I suggest to increase the level of practical knowledge.

2. The Teachers should avoid only lecture class they should try to active whole class. Means promote Group Decision, and our department is doing work on in , they promote Debate.

3. Account to me the Teachers should give work to everyone one equally neither on the basis of their interest nor on the speciality of the students because we are here to learn everything thing , we are in bechlors not in masters so I will to mastering in one subject or field only .

That's it , it is few suggestions from my side after my observation.

Thank You .

More fieldwork, more practicals, less theory

They should prioritise student who lack in studies separately.

Practical knowledge and educational tour are very crucial.

Institute should care about student's mental healthcare.

1. please Teach Via a Video In Every Class
2. Show and do Practically Perfectly.
3. See that every Student understant Or Not.

Provide professional internships
And better computers in lab

they should give us a little bit more time to us for self study.
as there multi[ple activities from hostel and administration are sheduled vary busy.

Everything is good.

Teacher should use projector's , real life examples,
And try not to put burden on students by giving a lot assignments and projects , student are getting pressurized under the work and not getting own time for self study

No comments. All teachers are good

Dsvv mujhe bahut acha lgta pr Yaha english or achi sikhani chahiye

Kuch teacher padhte achhe hai or kuch teacher ka behaviour achha nahi hai
Or kabhi kabhi khana achha bhi nahi milta hai jis karan se hum bimar ho jate hai

1. Time for self studying needed.
2. Practical learning more efficient than lectures.
3. Other activities participation should be according to the choice.

Weekly Organizing some fun activities that will the study stress of students such as indoor as well as outdoor games. Thankyou

1. Self studying time.
2. Less duration of classes.
3. Classes should be timely.

No

Everything is good...
Teaching methods are satisfactory
Teachers and helping and understanding

1. Less duration of classes.
2. Other activities participation not to be compulsory.
3. Self study time.

Please increase the number of good teacher.

Information about competition exam along with syllabus

I think that the department should think about more placement for the yoga students because the students who are having a strong personality in yoga they take that placement and the students who are not much good in yoga so they don't take that type of students in placement. So the university should take more placements for all yoga students
Because in our university the yoga placement are much less.
Thank you
Hope you will understand

1. Books should be well defined.
2. More time for self study should be available.
3. There should be time for students to have lunch between the classes.

Assign experienced PhD scholars as teacher.
Use more gadgets for teaching.
Yoga class should be taken with yoga instruments and with proper anatomical review.

- 1 कमजोर विद्यार्थियों को आगे लाए
- 2 विद्यार्थियों की झिझक दूर करने का प्रयास

- 1 प्रोजेक्टर के माध्यम से पढ़ाए ।
- 2 विद्यार्थी को समझाने का अच्छा तरीका रखें।

The thing also want from the institute in terms of teaching and learning experience are
Our teachers are well qualified no doubt but in Practical Yoga Classes needs some improvement like give knowledge and information about the yoga classes what's going in the field of yoga so that student is capable to learn technique ,props for improvement in asanas anatomicaly and physiologicaly by applying on individual. And skills improvement for Yoga Practical class.

Professional internship
Educational tour
Experimental methods

1. If there are holidays due to any programmes then there should be extra class also.
2. The semester should be a little longer.
3. which we learn as practical we should get this opportunity every Sunday to teach him to others. For example, we can go to different villages every Sunday and teach yoga to people. This will increase our experience and the work of the society will also get done.

Everything is fine

Teachers should not only think about completing the syllabus at a little time, the syllabus should be completed gradually over the entire time.

Students who come late should not be allowed to enter the class every day.

Teachers need to be strict about class timings. Otherwise the class atmosphere gets spoiled

Projectors should be used more.

There should be two way communication in the class not one way interaction only.

There should be a more practical than theory.

No all over Best

1. Try to improve interaction time with students.
2. Try some learning games while studying
3. Give only reasonable assignments.

Focus on learning outcomes, personalized learning

DSVV is the Excellent institute

1. The environment here is very good
 2. The unity of the faculty and all teachers here is the essence.
 3. They identify our mistakes and advise us to correct them
- Here are some rules I should improve a little

Increase in job placement

Practicals should be included.

Gap of 10mins should be given inbetween the classes.

Should conduct effective workshops.

No suggestion

Teachers should explain the level to all the children

Everything is good

Evening is good

i feel the teachers should be more interactive

Make a committee for students problems solve

We want maximum time in labs to practice for the major subject and make our major subject strong.

Good behaviour by staff,

Just with examples

Everything is good but we want to communicate in English for our vocabulary

All good

Its good

- Space between our internal tests
- we need only one internal/external test a day
- more time for studies

Space between our internnal test more our assignment.

The first observation is: teachers are always be a good hard worker
So from teachers side , teachers always give right direction to the students
The second observation is : teachers always understand what the child doesn't
The third observation is: If teachers pay full attention to the studentsthen there is aslo the duty of students to pay full attention in the class....in which they gain knowledge.....
From my side
I fully support teachers in every situation
Thank you
Pranam 🙏

Good

Teachers should teach like upsc pattern so that every student have the actual knowlege of what really education is not based on the prejudices ,assumptions and stereotype thinking because half of the indians are living in superstition so I think teachers theirself should be well studied in indian knowledge system and therefore in western education and based on the conclusions of both the education should be imparted .

Nil

Good

Satisfactory

Good

1. Our Schedule is so busy so teachers should give students some free to explore new things.
2. Teachers can emphasize more practical work over theory work.
3. Some teachers are really good so university can give them a fair salary so that they didn't leave the university and join another for better pay.

idealist conditions,i don't think about anything that needs to be improve

No everything is very good

The overall learning experience is very good and effective.

extra activities to related topic and two way communication is also important factor

Try to reach out to every student and ask for their doubts.

Taking regular classes.

Emphasizing practical learning

अध्यापकों की संख्या में बढ़ोतरी करें

Provide sufficient teachers to department

1 : Integrate active learning methods such as group discussions, problem solving sessions, and hands-on projects. This encourages collaboration and critical thinking, making learning more interactive and memorable. 2 Implement tools such as online discussion forums, educational apps, and virtual simulations. These resources can promote better engagement and give students a variety of ways to access and interact with content 3 other Activities

Hire educated teacher

More communication

More interaction

Explaining the topic ENGLISH as well as Hindi .

I have no idea

Focused on Weak students, Use examples

1. Teaching more instruments in music
2. Group discussions during class to help form individual opinions
3. Weekly quizzes for subjects to help retain better

Student feedback system

- 1.Increasing teaching methods
- 2.Use of technology
- 3.student's feedback system

1. शिक्षण विधियों को और ज्यादा बेहतर बना करके।
2. टेक्नोलॉजी का प्रयोग करके।
3. छात्रों के द्वारा उनसे पूछ करके भी कुछ बेहतर बदलाव किए जा सकते हैं।

- 1.More of application based teaching should be inculcated for better understanding.
2. Mixed language should be banned in exams giving the students the option to write either fully paper in English or in hindi but not in mixed .
3. English speaking extra classes should be provided for the students as well as communication skills classes should be there in order make them interview ready .

I like how the give us proper eg with activity

They help us to overcome fears

They help us in learning nd also take personal feedback to us

- (1) It would be better if experienced teachers take classes rather than PhD scholars.
- (2) Good yoga instructors should be provided for girls.
- (3) Learning skills should be further enhanced.

Sanskrit Environment like Gurukul . Ex. Sitting on Earth, speak only in Samskrit between teacher and students.

Department should organise extra curricular activities atleast twice in a month.

Should conduct students teachers meeting at end of the month.

Good teachers

Good environment

Sprituality nd good people

Nothing

- 1.All students compulsory to participate in curricular activities but they not.
- 2.All students do not follow instructions by time.
- 3.All students do not complete work timely.

Give equality to each and every student

There is lots of students and all students are different from each other.some are topper some students are at an average level but teachers should give priority to every students not care only for topper students.

-Some space for study for internal/external exam.

- need one exam a day only.

यहां की कार्यप्रणाली सुव्यवस्थित है

भोजनालय में बर्तन साफ करने की व्यवस्था की जाए क्योंकि उसी सर्फ में सभी लोग बर्तन साफ करते हैं संगीत विभाग में तबला संगत करने वाले की व्यवस्था करने की कृपा की जाए प्रत्येक विभाग में कमजोर विद्यार्थियों के लिए अतिरिक्त विशेष कक्षा लगाने की कृपा की जाए

Students ke liye solutions Ke liye kuch kar sakte h

Work shop program

1. Try new teaching methods so that students can easily understand.
2. Try to connect students with practical knowledge of their field.

Actually they use a effective way for teaching.
They also understands the problems of the students.

I think there should be a well-trained yoga instructor teacher for the yoga practical classes

Good

Everything is good we learn each day

Everything is fine

Lake of study materials

Education based teaching
Computer based teaching
Proper communication

Proper communication, computure bassed teaching, provide the best knowledge of subject

Very nice and beautiful campus or spiritual environment and All teachers get love like parents.

Don't judge those student who are not able to better in any other activity with those who do best in every activity

ठीक है

Nothing

हमारे विभाग में योग H O D नियुक्ति हो।
विभाग का अपना भवन हो।
योग शिक्षकों की नियुक्ति हो।

More practical knowledge be good, also use English language medium of communication and notes, give less assignment and just copy paste file making

सब अच्छा है

शिक्षक अच्छे होने चाहिए जो विद्यार्थियों की भावना को समझे ।

Nice very good excellent

We should be provided previous years question on time and tell about the important question which were asked in exam. Teachers should be cooperative always not rarely

Good

- *Need good teachers
- * Provide good food
- *Don't exert unnecessary spirituality on students, this things make them atheist

Overall good

Kindly provide sufficient time for self - study.

Kindly plan the classes whole in either first or in second half.

Kindly focus on more practical approach of teaching.

1. Schedule of classes and other activities should be reconstructed . It Should be centered around the wellbeing of the student .
2. Proper classes with skilled and professional mentors should be provided .
3. Use of white/black boards for teaching should be increased as none of the teachers use the for even once.
4. Teaching practices for master student should be increased .
5. Quality books including professional books should be made available in library . Including books related to medical science

Increase skilled and professional teachers

Reorganize daily routine

Increase interest of students in co curricular activities rather than imposing them to participate the un beneficial political sessions

सभी कुछ काफी ठीक तथा अच्छा है

अध्यात्म के प्रति सजगता ,वैचारिक शिक्षण पर विशेष प्रयास, शैक्षणिक गुणवत्ता में ध्यान देने की आवश्यकता है, भोजन व्यवस्था में सुधार की आवश्यकता है, जो भी कक्षाएं चले उसमें विषयांतर न हो, अनुभवी व्यवहारिक शिक्षक हो , विद्यार्थी के विकास के लिए उनके द्वारा कार्यक्रम आयोजित किए जाएं, विश्वविद्यालय के अंदर विद्यार्थियों के साथ कर्मचारियों द्वारा दुर्व्यहार न किया जाए, प्राचीनता एवं आधुनिकता के मध्य समन्वय स्थापित किया जाए, महापुरुषों के नाम की श्रृंखला को एकत्रित करके हम सभी विद्यार्थियों से उनके त्याग समर्पण निष्ठा से परिचित कराया जाए, भारत माता की जय ॥ हृदय से वंदन धन्यवाद ॥

- 1- Reduce the number of classes (its create stress on students to attend that much classes 2- Start conducting the seminar for students for the motivation or related to Their Subject basis seminars by some big personalities in that certain field (person who is actually a good influencer for the society)
- 3- Please make sure Conduct regularly sports activity on course / hostel level weekly .
- 4- Give proper rest on sunday ,don't conduct any activity that gives stress to the students or force them to attend it .
- 5- Main thing is about food please make sure that the good nutrition food provide to the students with having salad,fruits or vegetable includes .

Teacher explains the topic with examples

Bilingual teaching medium.

Teacher should focus whether if students are actually learning or just studying.

Great

practical teaching

- 1- teachers approach to teaching
- 2- ensure curriculum knowledge
- 3- professional development

Interactive Learning Methods: Encourage more practical and interactive sessions through case studies, group projects, and real-world problem-solving activities. This will engage students more deeply and help them apply theoretical knowledge in practical scenarios.

Incorporation of Technology: Introduce modern learning platforms and tools, such as virtual labs, simulations, and AI-based learning apps, to enhance the learning experience. These technologies can make complex concepts easier to grasp and provide students with hands-on experience.

Personalized Mentorship: Establish a stronger mentorship program where faculty members guide students based on their individual strengths, weaknesses, and career goals. This will help create a supportive learning environment, motivating students to achieve their full potential.

1) Poor syllabus design.

We are being taught diagnosis prior to Pathology.

Biomechanics should have been taught in the 1st sem, now in the 4th sem we will be studying.

In the 3rd sem we have given Acupressure TCM along with Alternative diagnosis when TCM is itself totally new subject for all of us additionally been added with diagnosis.

Students with 0 knowledge of yoga should not be given admission for post graduation. The reason is because of those students the Teachers has to lower the standard of the subject knowledge. Hence there is no progress, enhancement in our knowledge.

2) Lack of a good practical training.

Therapy itself is a practical subject. We could not learn much in marma therapy. For diagnosis both modern and alternative we don't have practical where it is as important as knowing theory or even more than that.

In accupressure department because of interns came from other Universities we were not given duties. When we asked them personally claiming the same reason, we were denied.

Yoga therapy such an Important subject had no practical and had been taught worst. 50% of syllabus was covered by students by themselves.

3) The worst Experience in yoga practical

The Most important Yoga practical Since the very 1st Semester we have no teacher who consistently has taught us, who knows the strength of each student. We have 0% improvement physically while doing the asanas and in the teachings skills.

We don't get chance to teach our class so that we can improve our teaching skills. Even the Teacher herself never taught us the teachings skills.

1- Please! Include biomechanics as a subject in our syllabus in IV semester.

2- Please! Provide more nutritious food in the mess to the students who perform more physical activities such as yoga and sports.

3- Stationary and general must be open from 8 am - 8 pm.

Nothing

Communication

My experience this University is very well for sprituality.

Discipline is the key of success.

Improve teaching quality

Language issues

Food quality

Improve teaching quality for some teachers, increase food quality, language issues- use English also

1. फर्स्टली टीचर प्रोजेक्टर का v यूज करें और साथ में व्हाइट बोर्ड का वि यूज करें

2. जिनका बैकग्राउंड हिन्दी है उनको थोडा सा हेल्प करे सके और बहुत बच्चे बहुत कुछ सीख के नहीं आते हैं उनको नहीं पता है सही क्या है गलत क्या है ना कोई गाइड करने वाला बट यह आइए है तो इतना हैं जो कोई बताने वाले हैं

3. सबसे बड़ी बात यह है कि यहां के jo मोहोल है ,बच्चे ना चाहते हुए भी बहुत कुछ सीखना चाहते हैं ,ओर खुद के ऊपर टाईम देना चाहते , और यहां के माहोल में रेहाना। चाहते हैं जो यह के टीचर सीखने ka prayatn करना। चाहते हैं ओ sikhna है।

Basic concept

Real life example

Practical

no remarks

Increase faculty, changes in yoga class

Language problem ,

Teaching method must be effective,

Yoga Practical guidance must be changed and add to useful information

Can make better facilities

1..i didn't observe so can't say anything about it.

Decrease in the no. Of classes per day, Engage the students of univerty as much as in co-curriculum activities, Every Saturday evening should remain vacant for students co-curriculum activities.

1.Pls connect philosophy with todays scenerio

2.also scientific explanation in philosophy will make more practical understanding

3.time span of classes should be reduced because scientifically it is proven that 40-45 minutes on we can concentrate or focus. Earlier also I have said this but no action was taken.

Professional internship for psychology students is required which is itself given by the university so that we can gain practical knowledge .

Should not too rigid about rules ...this distructs the students overall growth.

Attendance should be updated at ERP.

Professionalism should be there.

1. Presentation and assignments process should be discuss with every student A guide session should be given to students by teachers with proper interaction and without judging the doubts.
2. Review the timings or classes ...all day students are taking classes hence doesn't have time to selfstudy and extra curricular activities
Classes should be arranged in morning session or in evening session...whole day won't be consumed in classes only
3. Research projects should be there in every year..
Group assignments are also should be part of semester

Teacher should be Polite.
Teacher should be strongly prepared before take class.
Teaching Quality of Teacher and their skills should be good.

The sports section in not good as the availability of the sports material in not good
Prayer is good but the amount of time we spend on prayer is more than the time we spend on our fitness

Invest in training of the Teachers/Professors.
Don't force students to participate in Extra Curricular Activities.
Be liberal with the rules regarding roaming in and outside the campus.

1.Focus more on practical 2.interactive learning method

1. Teachers should have more experience in their particular subjects .
2. Assignment procedure can be more effective. Rather than copy paste from books
- 3.. Allow students more field work in their respective subjects. specially in final year of degree

The book should be ordered from the library. Classroom should be provided. In the hostel, change the light switch system to 10 PM to 11 PM so that students can get time to study. The number of teachers should increased. Webinars, seminars and workshops should be conducted.

- 1.improve teaching quality more.
- 2.improve food quality (this is most important)
- 3.overall some rules are not fair enough.
& some rules are good. So look out that rules which is over for students. Etc

Very good

Good

Give more examples while teaching which can be more relatable to practical field and life
Must teach us the professionalism

..

Please improve the food of mess

Workshop sessions

- 1- Please! Include BIOMECHANICS as a subject in our syllabus in IV semester.
- 2- Please! Provide more NUTRITIOUS FOOD in the mess to the students who perform more physical activities such as yoga and sports.
- 3- Appoint better faculty. Samay Daani teachers are not always of quality.
So have a better RECRUITMENT SYSTEM.
And keep taking FEEDBACK on more regular intervals for better management.

4- HOSTEL FEEDBACK FORM SHOULD ALSO BE GENERATED.

Little effort from professors to make the learning exciting.

To bring more well qualified teachers for university.

group discussions and industrial visit should be provide .Also prepare students for job or entrepreneurship should be given at least 3 months.

encourage students towards personality development

1. University should work on their teaching training programs.
2. University should take action on students' fitness by conducting non yoga classes and gym equipment.
3. University should give outing every sunday by managing time of boys and girls.

In my thought,all things of here is going good .i want some extra language classes from universit and always be focus on student personal skills improvement.

We can improve teaching experience by teaching more practically rather then theory class.

1. Teachers should have proper field experience.
2. In Journalism and Mass communication Department Digital Marketing course should be be introduced as it is highly demanding in field
3. At least 3 months professional program should be add in syllabus

1. Integration of Technology.
2. Organize seminars, conferences, and cultural events.
3. Develop a robust feedback system for continuous improvement.

There should be particular curriculum to assess the student's learning

Teacher's should be explain things with an industrial perspective

The assignments should be given as per student's calibre

1. Interactive Learning Use hands-on projects and discussions to engage students.
2. Regular Feedback Create channels for student feedback to improve teaching methods.
3. Interdisciplinary Programs Encourage collaboration between departments for a broader learning experience.

Bringing placements for students , giving them smart classes and getting them ready for professional internships

1. Interactive and Practical Learning,
2. Regular Feedback Mechanism,
3. Student Wellness and Support Services

1. Well educated and trained professionals should be allocated for yoga

2. Effective instrument and devices should be available for therapy students

3. More yoga related books should be there in library as there is always shortage of books .

I think the schedule is too much busy for us we can't get time to self study and think about ourselves, so I think classes should be till 2-3 pm only. We can get time for participating in Curricular activities too.

PRACTICAL EXPERIENCE

DIGITAL MARKETING SUBJECT SHOULD BE INTRODUCED IN JOURNALISM DEPARTMENT
FILM MAKING COURSE SHOULD BE INTRODUCED

The book should be ordered from the library. Classroom should be provided. In the hostel, change the light switch system to 10PM to 11PM so that students can get time to study. The number of teachers should be increased. Webinars, seminars and workshops should be conducted.

Morning practical class and also the place where we practice in morning

Quality of food

Timing of the hostel prayer...

First they should make class interesting by some activities second be on their topic that they teaching us do more group works because it will help us in our adjustment skills

Good

1 Advance yoga training with the explanation

2 observe the students body alignments, posture, instruct well and correct the posture in mid

3 discuss about the students downfall or progress

Teachers should listen students...new yoga teachers..focus on practical portion also

1- Please! Include biomechanics as a subject in our syllabus in IV semester.

2- Please! Provide more nutritious food in the mess to the students who perform more physical activities such as yoga and sports.

3- Stationary and general must be open from 8 am - 8 pm.

1. There should be a good student teacher relationship or interaction.

2. Prayer timing should be 9am .

3. Some unnecessary rules of hostel .

It should be Student Centric.

It lacks teaching students how to be professional in their field.

Excellent experience

no Suggestions

EFFICIENCY, DEDICATION, FOCUS MORE ON STUDIES.

we also need to participate to extra curricular activities and explore other departments creativity and activities.

nothing, everything is good.

practical or relatable , focus on skill , creative

It is all good over here, no such improvement is needed

i don't know

It would be slightly better if the teachers could complete the syllabus timely.

It would be helpful if teachers could sometimes tell us about professional life and some soft skills that we could develop .

Since we're studying therapies it would be beneficial for us if there were more practical classes in the syllabus

Prepared & Experience

Teacher should be focused on the practical more than the theory.
Arrange debate, discussions on weekly basis for students.

practical teaching
need some mba course
need some anchoring practice

1. Establish regular feedback sessions
2. Student-Centric Activities
3. Incorporate Technology

* use hindi-english Language 50%-50% combined, ppt while teaching.
* need some more experience faculty to enhance learning quality in the practical and subject field.
* need some practical approaches like lab, clinical workshop and tour with theoretical classes.

Our university not only has a curriculum but also integrates it with great culture and spirituality.

Practical exposure .

Workshop aur sessions .

Class discussion should be held between students or debate should be held where both pros and cons of a topic could be known by everyone

More focused on teaching skills our teachers have great knowledge but they are having lack of communication skills how to explain things make them interesting

2. Only theoretical based knowledge.
3. Professional internship must be provided with social internship.

As I join this university for the popularity of yoga courses and yes I am gaining a lot many knowledge and experience, but I also experienced lack of theory knowledge given by the mentors . Also I think teachers should teach bilingual and the last one is that I found the shatkarma area is shabby , It should be hygienic.

Otherwise my overall experience is very good 😊

Thank you .

I have no suggestion actually I am satisfied with each and everything.

Please start advance yoga practical classes in morning

Be able to understand the problems of students what they r not able to understand through creative classes

- 1) Teaching is average(Faculties can still improve in their teachings)

Personal Opinion:-

Many yoga students are yoga instructor in masters program & They are taking online yoga classes so University should make rule for them to use smart phone for online classes in the some Particular(decided area only)area of campus.Because in the hostel we have not enough place to take class & Disturbed internet connection.

Weak children should get basic information

There should be more classes so that students can reason more and explain more.

Teachers should spend more time with children

We can do :-

1. Different variations of yoga like ashtanga vinyasa yoga in yoga practical class.
2. Correlate with therapy in practical classes.
3. Communication skills enhancing classes.

1. Practical par jayadh dhayan diya jaye

2. Study ke liye free time diya jaye

3. Roj teachers davara kal ka pdhaya discuss Kiya Jaye

Teachers are doing their job very well . They don't need any suggestions

Practical section of studys

All things are good and manageable.

Encourage more interactive and practical learning in yoga to bridge the gap between theory and real-world application.

1. Give classes to experienced teachers rather than PhD scholars atleast in masters level
2. More practical classes than theoretical classes
3. Interactive sessions with professors from different universities.

1.Go deep on the topics 2. engage In every other institutional curriculum to each student 3. Practicenal work should be provide in different variation and more

I highly recommend for teachers to take proper class on time.

CONSISTENCY EFFICIENCY COURAGE

NONE

Everything is good enough

Teachers should be well-skilled and educated.

They must be able to explain topics in a simple and clear way so that all students can easily understand.

Teachers are also expected to take regular classes to ensure consistent learning

I am satisfied

In history department classes should be on smart board.

Use Audio visual method

Provide more opportunities/guidance

it is pretty nice need some more

Nothing

no suggestion

More interesting breakfast:)

Combined practical class of MSc and Bsc should totally avoid.

Everything is good

Every thing is good, but I feel that as this is a satvik or traditional culture based university so we have to reduce packet or morden chemical things as much as possible which effect not only our physical as well as emotional health..... besides it we can use natural things like on the place or packet milk and ghee if real cow based products is available then it is really healthy also on the place of using sugar we can use jaggery also we can make a change for using hand make chips and shake from using packets of different companies, it also helps help in women employment as most of the things are self made.....more employees are needed.....OM.

-

More practical exposure, study tours, more workshops

1. More practical knowledge
2. More use of ppts and visual presentations like videos photos
3. New cratice enjoyable idea of teaching

Punctuality, Fair observation, Communication well.

Need more English communication teacher for enhance our language in class
Try to do friday saturday activity for enhance our skill

Students should get practical exposure and industry visit students should get proper notes and study material.

None

Overall Good

Teachers should take classes as 50 50 ratio(teachers and students side)

Teaching is very good

All is good

More practical in python

Class should run 45 min. So that in less time student can catch the main points , Need much improvement in Yoga Practical guidance.

1. Domain Expertise: Teachers should possess an appropriate depth of knowledge relevant to the subject they are teaching. Relying solely on online sources is not enough; thorough domain understanding is essential for effective teaching.
2. Effective Explanation of Concepts: While using PPTs is acceptable, each topic should be explained comprehensively, ensuring students grasp the concepts. Instructors should make greater use of the board for detailed explanations, promoting better engagement and understanding.
3. Emphasis on Practical Knowledge: As a computer science student, practical knowledge is crucial. While the institute does offer opportunities for practical learning, it lacks serious commitment and proper guidance. Strengthening the practical components with focused mentorship will better prepare students for real-world challenges.

Teachers requirement
Theory and Practical

1. Need to change/improve Life management Teaching techniques

2. Educational tour related to the department or course.

Please provide professional internship

Lab system extended

Use projector in history department

good

1. Use English language for English medium students.

2. Projector aur LED TV issue

3. Improvement of morning yoga practices

Ayush sir class should be improved

More practical classes, going for labs, skills enhancement class

1. Available best compitonal books.

1) Interactive and experimental learning.

2) Proper use of technology.

3) Personalized learning approach.

Nothing

Teacher should explain the things in English language

No comments

I am stasfied by the overall teaching method of our institute

1 Tell us how to use in practical life.

2 Try to understand the concept with the help of video or images so that we can remember it for long time.

3 Make us the use of theoretical knowledge in our daily life.

give me some time

1. Yoga Therapy Syllabus can be better

2. Hostel leave application system is very complicated, even if the parents allows us to go, sends the signatred email and talks to the the warden they still questions students and parents about leave, and also makes their own rules.

3. There should be a little more focus on communication skills.

Nothing

1 .Expert teacher hona chahiye,

2. Teaching management behtar kre,

3.Class kbhi bhi cancel hoti he ak din purv suchna nahi milti.

To give us more and more practical examples that help students to learn or grab the things quicker .

It's already perfect

Concet to the students

Friendly behaviour

Talking softly

Make class more practical

Lack of some books
Lake of some books
1.sometimes teacher focused on strong student only 2.sometimes teachers focused on to complete syllabus
To give more attention on study rather than attendance and give internal time table as external
There should be wifi in hostel. All pc should be tactically correct. Breakfast should be provided in the morning.
सब अच्छा सब अच्छा
All is good
To focuses more an individual performances or to organise more opportunities to performance of individual student.
मुझे कुछ समय चाहिए।
Class timing will be of 45 minutes Ask students about the topic first Teach in a creative way
No observation
Good
BIT lab computer's processing is very low they need to exchange with good processing computer's, Inter College competition should be held
No suggestions
Good
Some give the rest time bt perfect gurukul like a takshashila. Or an ancient gurukul
For overall improvement - it is necessary , that the efforts of all the teachers should be included . individuals efforts will not give the fruitful results
Internship opportunities should be provided,educational tour, lacks practical exposure

Professor's have well experienced and those given some soft skills.
No suggestions
Nothing
Faculty members should be increased and well specified for particular subjects Placement cells should be improve its functions for inviting companies to visit companies Intership facilities should be available.
I want that learning practical knowledge. And i also want basic technology knowledge.
Teach demonstration method, Teach with multiple examples to Clear the concept,

More activity oriented theory

1. Good food 2. Good skills 3. Qualifie thachere

The learning process of yoga practical class needed to be done in a better way .

The theory class should be in bilingual.

Experience :-

The campus life of dsvv is fully eco friendly and peaceful .

Use methods which make class more interesting

Use more animated pr 3D visuals for better understanding. More encourage and motivation from Teachers for students to push them forward.

Some teacher's don't use board for explanation,they read from there paper notesthey can write key words

Achcha hai

Practical syllabus should be done properly

Assignment files should be less

Teacher should use the diagram to explain the topic

- Teacher should use digram or presentation for better understanding of students in subject like anatomy.

- Practical syllabus should be done and performed properly in both subjects of minor as well as in major.

कोई भी प्रतियोगिता की जानकारी सभी बच्चों को देना चाहिए।
(योग प्रतियोगिता)

योग में पहले से और बेहतर तरीके से पढ़ा सकते हैं

-Teacher should use digram for better understanding of students in subject like anatomy.

- Practical syllabus should be completed and performed properly in both subjects of minor as well as in major.

sorry I don't have anything to suggest right now

Teacher should use digram or presentation for better understanding of students in subject like anatomy.

- Practical syllabus should be done and performed properly in both subjects of minor as well as in major.

Teacher should use digram or presentation for better understanding of students in subject like anatomy.

Anatomy and physiology ko Hindi or English dono m padhaye Hindi medium vale students ko bahut problem hoti h samajh m nhi ata or notes v nhi dete h

Classes should be of max 45-50 min.

Classes should be of maximum 45 minutes.

Syllabus should be reduced!(sec)

Teachers should use ppt to teach students in effective way!

Time of classes should be managed properly. So, that students can get time for themselves.

Teacher should use ppt to teach students in effective way!

Time of classes should be managed properly.so, that studentscan get time for themselves

Syllabus should be reduced!(sec)

More and more practicals should be there.

पैडिकल भी कराया जाए ।

They should use projector to explain

Professional site visit and internship opportunities for psychology student must include in the program.

There should be diagram representation of anatomy classes

Personalized Mentorship,Technology Integration, Interactive Learning Methods

Practical part should increase A visit should be made to a college related to yoga.Workshops for therapies should also be organised

1) Everything is ok ,we need to work hard.

Practical approach for each subject .

1- Please! Include biomechanics as a subject in our syllabus in IV semester.

2- Please! Provide more nutritious food in the mess to the students who perform more physical activities such as yoga and sports.

3- Stationary and general must be open from 8am - 8 pm.

Personalized learning

Professional development

Technology integration

Everything is good

योग विभाग में मास्टर डिग्री में अधिकांश क्लास अनुभवी शिक्षकों को देना चाहिए ना कि पीएचडी स्कॉलर को पीएचडी स्कॉलर अपने स्तर पर काफी अच्छा पढ़ाते हैं परंतु कई बार लगता है की कार्य की अधिकता के कारण वह उस सब्जेक्ट को उतना अच्छे से नहीं पढ़ पाते जितना की उस विषय का कोई एक्सपर्ट प्रोफेसर पढ़ सकता है 🙏

1. social exposure

2. professional internship

3. educational tours

Use some research paper or tools to elaborate about topic

There is no deep information or knowledge according to master's level

Please give us some time for self study

In Im teachers should talk about the daily life of students help them to face their challenges

1.Need more well trained teachers who teaching capabilities are higher.

2.Should conduct mock interview round test process for last year students to boost their confidence before real interview.

no

All good

Interactive learning

National education policy

Feedback

Interactive Learning

Feedback Mechanism

Professional Development for Educators

Everything is best

Everything is good

Everything is good

I don't think there is any way

There is no suggestions about teaching and learning because everything is good

All things are good

When a teacher teaches students it doesn't only share it's knowledge but also share a part of its prana or energy to the students.

But it is observed by me that there are some teachers who takes away students prana or energy and students become dull and sleepy unable to understand the concept.

What's the reason

Reason to the situation is the teacher teaching is itself is low on pranic energy .

Why

Three reasons are there/more possible

1. Either the teacher is doing more than the capacity than the pranas he/she holds and depleted. That's why sucking prana of student.

2. Prana or the energy of a person is aimed as it focuses on any entity. flows by itself as one focuses but can be controlled the flow by will.

And our heart is responsible for the source of flow as mind focuses and will.

The teacher is not teaching by putting its heart into it.

3. Teacher is not practicing gayatri mantra jaap

Or not doing it enough.

Please do teaching of new things

I don't have any suggestions right now.

Nothing

By minimizing the timing of other classes

Feild experience and a professional internship for psychology students and more practical experience

Through my observation I am satisfie with my mentor but sometimes we have to understand the situation and motivate through their work and politely recover their mistakes.

More internships and better

- University provide us with Life Managemnet Classes which help us to change our perspective , The way of Looking at our Life Situations , helps is to stay connect with our Diverse Culture .

Invlove deigital technology in hour study room

All facilities are good have very good teachers all are very good

They tech very well.

Focus on weak students

Teach concept with example and case studies

Increase other learning activities

Remove SEC

REMOVE MULTI

Increase focus on major

Don't do over things and understand the student and just do more focus to growth of students skills career and abilities!!

Good

- By Giving proper notes to the students
- By enhancing the skill of the students
- By understanding the ability of the students and work on that

Focus on student studies
And improvement in the computer monitor here
Focus on weak students

take class everyday
more focus on weak students

1. Practical knowledge is required
2. Proper diet for yoga students
3. Focusing more to major subject

Nothing

1. Teachers solve our doubt on the spot
2. Industry and company experience and visit
3. Guest lecture and other activities provide

Yoga students ko bhi tour pe le jaye sir please.
Practice ke liye yoga equipments bhi hone chahiye.
Use Digital Game-based Learning.

Use graphics and visual media to engage students.

We want best faculty in our university.

Overall good

१. शिक्षक हमें हमारी योग्यता अनुसार ही कार्य देवे हम भी उन्हें समझने का प्रयास करेंगे।

- 1) student ki योग्यता ko dhyan me rakhte huy assignment de.
- 2) sabhi teacher class time se chhodne
- 3) sabhi teacher class me jo padha rahe use practical ke dwara samjhay to jada samjh aayega 👍👍
aor sabhi teacher apne anusar bahuut accha padhate hai !

- (1) All teachers come to their classes on time and leave on time.
- (2) Student's problem should also be understood
- (3) Whatever subject the student is in, he should be taken to the competition related to that subject.

- 1) teachers bahut achhe h sbhi 2)
Hume vocal ke sath student
V sikhaya jaye 3) or har tayohar pe kuchh kuchh program hona chahiye

Library should provide with more books
The teachers should be patient while teaching

Bring good teachers in department for students bright future
Foreign teachers will be best for teaching as per my experience and they are highly knowledge and open minded for teenagers as a teacher

Comprehensive Student Satisfaction Survey Report

Overview

This report summarizes the findings of the Student Satisfaction Survey conducted with 648 respondents from Dev Sanskriti University. The participants represent various departments and degree programs, giving a broad view of student perceptions regarding their academic experience. The survey reveals critical insights into the quality of education, learning environment, and areas for improvement.

Key Insights

1. Demographic Overview:

- **Departments:** The respondents belong to diverse academic departments, including Journalism, Rural Studies, and History. This reflects the multidisciplinary nature of the university.
- **Programs:** Most students are enrolled in bachelor's programs, while a smaller number are pursuing master's degrees. The students span different semesters, providing a cross-sectional view of experiences at various stages of their academic journey.
- **Gender and Age:** The gender distribution is fairly balanced, and most students are in the age group of 17-21, representing young adults at the beginning of their academic careers.

2. Academic Experience:

- **Overall Satisfaction:** A significant proportion of students (more than 80%) rated their overall experience at the university as positive. This indicates high levels of satisfaction with academic programs, campus life, and resources.
- **Teaching Quality:** Students have generally positive perceptions of the teaching quality. Most responses indicate that faculty members use engaging methods like examples and applications to explain concepts effectively.
- **Use of ICT Tools:** Over 70% of the students reported that teachers frequently use ICT tools (such as LCD projectors and multimedia) during lectures, which supports modern and interactive learning experiences.
- **Learning Resources:** Students appreciate the availability of educational materials, but some suggest improvements in areas like practical application and personalized guidance.

3. Institutional Strengths:

- **Innovative Teaching Methods:** The use of technology in classrooms is seen as a strength. ICT tools play a critical role in enhancing the teaching-learning process.
- **Quality of Faculty:** Students consistently report that teachers are well-prepared and provide clear explanations. This speaks to the dedication and competence of the faculty.
- **Holistic Learning Environment:** The university's focus on holistic development, as expressed in many comments, is appreciated by students. This encompasses not only academic learning but also extracurricular activities that promote overall growth.

4. **Areas for Improvement:**

- **Practical Exposure:** Many students highlighted the need for more practical work and hands-on experiences. They suggested increasing opportunities for internships, workshops, and educational tours.
 - **Support and Feedback:** Students desire more regular feedback on their performance, particularly in identifying and addressing their academic weaknesses.
-

SWOC Analysis

Strengths:

1. **High-Quality Faculty:** The majority of students agree that teachers are knowledgeable and present material in an engaging manner. The use of examples and real-world applications adds value to the learning experience.
2. **Technology-Enhanced Learning:** With over 70% of teachers using ICT tools regularly, the university is embracing modern educational practices that appeal to tech-savvy students. This not only enhances engagement but also keeps the learning process dynamic and interactive.
3. **Positive Student Experience:** The overall satisfaction rates indicate that the university is successful in providing a fulfilling academic and social experience. Many students expressed pride in being part of the institution.
4. **Support for Holistic Development:** The institution's focus on holistic development, including spiritual and physical well-being, is appreciated by the students, especially given the unique nature of Dev Sanskriti University.

Weaknesses:

1. **Lack of Practical Exposure:** While the theoretical foundation is strong, there is a clear need for more practical learning experiences. Many students feel that the current curriculum does not adequately prepare them for real-world challenges.
2. **Limited Personal Guidance:** Some students indicated that they struggle with receiving personalized support and feedback. This suggests a gap in student-teacher interaction beyond regular lectures, which could be filled by mentoring or advising programs.
3. **Inconsistent Quality of ICT Usage:** Although a large percentage of teachers use ICT tools, the survey suggests variability in how effectively these tools are used. Some students felt that these tools were underutilized in certain subjects or by certain faculty members.

Opportunities:

1. **Expansion of Practical Learning:** The university has an opportunity to introduce more experiential learning opportunities such as internships, field trips, and practical workshops. These would help bridge the gap between theory and practice.
2. **Digital Learning Platforms:** With a growing reliance on ICT, there is potential to further integrate digital learning platforms like Learning Management Systems (LMS) to provide personalized feedback and track student progress more effectively.

3. **Collaboration and Partnerships:** Building partnerships with industries and other educational institutions could provide students with exposure to real-world applications of their studies. Collaborations for research, internships, and project-based learning could further enhance the student experience.
4. **Student Mentorship Programs:** Introducing structured mentorship programs where faculty or senior students guide younger students could help address the feedback and support gaps. Such programs would not only provide academic support but also career counseling and personal development advice.

Challenges:

1. **Maintaining Quality Amid Growth:** As the university grows and enrolls more students, maintaining the quality of education and personalized attention could become challenging. Balancing expansion with consistent quality control is crucial.
2. **Adapting to Rapid Technological Change:** The rapid pace of technological advancement means that the university must continually update its infrastructure and teaching methods to stay relevant. This can be resource-intensive and requires ongoing faculty development.
3. **Student Expectations:** With an increasingly diverse student body, meeting the varying expectations of students from different academic backgrounds and with different career aspirations can be difficult. Tailoring the academic experience to these diverse needs is a challenge.
4. **Competition from Other Institutions:** As higher education becomes more competitive, particularly with online learning gaining popularity, the university faces pressure to differentiate itself through unique programs, high-quality faculty, and advanced technological integration.

Conclusion

The Student Satisfaction Survey at Dev Sanskriti University reveals a generally positive outlook from students. The strengths of the institution lie in its committed faculty, modern teaching methods, and a supportive, holistic learning environment. However, there are clear areas for improvement, particularly in terms of practical learning experiences and personalized feedback. By addressing these gaps and capitalizing on the opportunities for growth, the university can continue to enhance student satisfaction and institutional performance.
