## How is your overall experience of studying in DSVV ?

155 responses

Kindly share your overall experience about DSVV in few words

Positive

Fabulous & Unforgettable lovely experience

Divine ambiance. A course on Ayurveda was there in each semester.

Very nice & life changing experience @ DSVV.

DSVV is not just another university rather it's an feeling emotion. I have learned the lessons on life there. Academically, My syllabus and course content was way ahead of time. Now after a decade GOI is applying those things through NEP-2020.

DSVV is a place which gives me so much confidence and knowledge. The family environment inside the campus with teachers is appreciable.

Overall experience was good but there are very few chances of exploration

It is difficult to describe my experience of studying at Dev Sanskriti Vishwavidyalaya in simple words. Getting education at a place where there is the subtle protection of Gurudev and Mataji, the love of respected Dr. Saheb and Jiji and the company of able teachers is no less than a good fortune.

Expert faculty, good learning environment, spiritual ambience, lectures on geeta and meditation by shradhhey, cultural activities....everything was fantastic and loveable.

DSVV Shantikunj is a nice place for studying, but the behavior of the local people needs improvement, as they can be quite rude.

The motto is well accomplished however in terms of individual development the resources still lack in the campus, the exposure to the world outside is very less in terms of academia and non academia also.

Life changing

Dev Sanskriti Vishwavidyalaya is known for its focus on spiritual education, holistic development, and a strong emphasis on values. The environment fosters a blend of academic rigor and personal growth, promoting both intellectual and ethical learning.

It's a beautiful place with full of spiritual blossom. This place gives vibrant energy to evolve oneself.

I am truly blessed that I got opportunity to study in DSVV. My graduation as well as Masters degree from DSVV are the wonderful achievements of my life. The period I studied in DSVV was the amazing learning period where I learned not only about academics but entered the world of Spirituality. Much much gratitude to Gurudev, Mataji and Shradhheya JiJi for their divine protection and continuous guidance. Today whatever I am it is because of them. A part of my heart is always residing in Shantikunj 🙏🙏🙏

I had the privilege of being a part of DSVV where I immersed myself in an exceptional cultural & academic environment. The system is brilliant and well-structured. The atmosphere of campus was equally impressive, radiating positive vibes that stimulated intellectual growth. The university not only provided me with a holistic education but also shaped my emotional & spiritual growth. I feel fortunate & grateful.

Overall learning about different aspects of life was unique and incredible

DSVV is a great place ,Dsvv takes very Few fee and provides quality education and have a supporting teaching staff.Overall I had a great experience.

University with the difference

I want to get another chance to study in dsvv.

Dsvv is unanimously a different university which holistic approach. It helps in building a overall progressive development that sums up with making a complete human being.

amazing atmosphere where you learn life management skill which is much needed for every aspect of human lives.

Dev Sanskriti Vishwavidyalaya changed my life in many ways. I improved my skills, behavior, and learned about scientific spirituality. The university helped me grow as a better person, both in my personal life and in my career. It gave me the guidance to become more conscious and kind.

DSVV ignited a spark within me! The unique blend of computer science (BCA) and Yoga/spirituality empowered me to become a holistic individual. Now, as a senior Yoga Instructor in Egypt, I inspire others to find harmony between technology and well-being.

It was a great experience full of practical knowledge and learning.

Overall my experience such very nice, my five years in DSVV like I am in heaven.

My overall experience is excellent

Beyond words, it was exceptionally wonderful. The ambience, mesmerizing vibes, divinity, soulful people and spiritual explanations-experiences.

It was a great experience that is going to be with me forever. I had a great growth as an individual. Be it in terms of knowledge, personality or the perspective towards life. I made some very great friends for life. I want to show my heart felt gratitude for all this.

It's like my second home, i learnt lots of things in this university. Boost confidence and improve life chances. Thank you so much Guru ji Mataji for your blessings.

Great place to live in the lotus feet of guruji

for personality development this place is very good. But as far as study is concern worst. only few teacher are capable enough and qualified to become a teacher. teacher are just wasting their time either to complete their Phd or getting govt job.

Good environment for learning and spirituality. Updation in department is expected.

बहोत ही अच्छे अनुभव के साथ मैंने dsvv से अपना पीएचडी कोर्स किया है। अध्यन के दौरान नियमित कक्षा, अनुभवी शिक्षक के मार्गदर्शन में अध्यन का अनुभव बहोत ही लाभकारी रहा।

Improve teaching skill and teaching methods.

It was family environment, good teachers syllabus was good, extra curriculum was good. Learned a lot, my confidence, tolerance all boost

Thanks DSVV to made me what I am today specially a leader.

All the teachers here are very much supportive, interactive and are highly qualified. They always support us not only in our study but also mentally. Not only in class time but we also abled to contact our teachers in other time when we needed.

---

Overall there is very good environment for holistic personality development.

---

The subject exposure and the options for cocurricular activities not only enhanced knowledge but also gave us the opportunities to upskill ourselves.

---

DSVV is not only a educational institutions it's a holistic approach to reveal the consciousness.

---

It was great! Really grateful for all the teachings that we learnt during that period.

---

My time at DSVV was the golden period of my life. It transformed me in ways I can never forget. Hundreds of cherished memories still fill my mind—the fragrance, the beauty of nature, the soothing meditation music, the geet, and the yagya mantras. All these elements remain with me, and whenever I want to reconnect with my DSVV days, I immerse myself in these experiences. Thank you for those unforgettable moments.

---

DSVV is an emotion for me, which can not be expressed in words. I earned everything from there. I learned how to make good relationships and how to maintain them as well. I miss the practical and classroom teaching of my gurus (Sunil Sir, Pragya Ma'am, Vivek Sir, Abhay Sir.....list goes on)

---

It's a man building institute with focusing wide perspective to transform the students into a good humanbeing. The diffrent physio-psycho-spritual extracurricular activities transformed me from the core and helped me to choose right decisions, explore my abilities, develop the life goals and follow with my best effort.

---

The ambience and environment of the university was fulfilling. I groomed as a person and the learnings are with me, that will remain forever. I found a plateform for my dance, a clinic to get exposure towards mental disorders and health.

---

My experience as a student in DSVV was great. I found a very supportive environment of studying. It was great experience to live a home like atmosphere in fully residential University.

---

That was a awesome experience while residing inside the campus.

---

DSVV is a very good platform to improve yourself and make yourself better than good. In DSVV, personality is improved in a much better way from spiritual point of view also. The teachers there also have a very helpful nature. I stayed in DSVV for three years. I consider it my good fortune to stay in DSVV for three years. Thank you Gurdev and Mataji for giving me this opportunity

---

Dsvv has build me from within. The values, morals all that I have is all because of dsvv's character building, life management classes and Geeta classes. The curriculum often blends spiritual education with contemporary subjects promoting a well rounded perspective. The University encourages social responsibility , with projects that involve community service.

---

The MJMC department at DSVV is making significant strides. While the overall experience is positive, there's a need for more practical learning opportunities, even with the EMD facility in ShantiKunj.

---

My overall experience was amazing and it is difficult to describe it in words. It was possible to learn scientific spirituality along with my course from here. This university is a confluence of Vedic and modern education.

---

I lived best time of my life in Dev Sanskriti Vishwavidyalaya. This university gave me Values, Ethics and great approach to life. Gita and Meditation classes was good. 🙏🙏🙏

---

---

The course was distance education with twice incampus practicals and exams. During Practiclas only one our morning class was there with rest of the day free. The campus is tranquil and good. The library facility and timings are also good. The administrative support was lacking

---

It change my life under guidance of pro vc sir

---

It was an incredible experience learning at the renowned Dev Sanskriti Vishwavidyalaya (DSVV). The university provided a holistic learning environment where academics and personal development were equally emphasized. I had the privilege to learn from knowledgeable faculty members who are experts in their fields, and the courses offered a unique blend of modern education and ancient wisdom. The campus culture fostered a sense of community, discipline, and spiritual growth, making my time there truly enriching both intellectually and personally.

---

Amazing learning experience from highly qualified, experienced, motivated and selfless professors that inculcated aspirations and wisdom for national development through scientific outcomes. The pragmatic learning opportunities generates through intercultural and international collaboration of the University.

Thanks to DSVV for being a part of my career growth and development and above all creating conscientious human being.

---

देव संस्कृति विश्वविद्यालय (DSVV) में बिताए मेरे समय ने मेरे जीवन को गहराई से प्रभावित किया है। परम श्रद्धेय प्रोफेसर जितेंद्र तिवारी जी द्वारा दिए गए जीवन प्रबंधन के अनमोल पाठों ने मुझे अपने जीवन को अनुशासन और आत्म-संयम के साथ जीने की प्रेरणा दी। इसी प्रकार, परम श्रद्धेय डॉक्टर प्रणव पंड्या जी की श्रीमद्भगवद्गीता की कक्षाओं ने मुझे गीता के गूढ़ ज्ञान को समझने और जीवन में आत्मसात करने का मार्ग दिखाया।

विश्वविद्यालय का दिव्य वातावरण, जहाँ हर कोने में शांति और सकारात्मक ऊर्जा का अनुभव होता है, ने मुझे आत्मिक उन्नति की ओर प्रेरित किया। प्रज्ञेश्वर महाकाल पर नादयोग साधना और आनंदमयी भोजनालय में मिला स्वादिष्ट भोजन इस अनुभव को और भी सुखद बना देते हैं। विशेष रूप से, परम श्रद्धेय जीजी के प्रसादरूपी बेसन के लड्डू ने मेरी आत्मा को संतुष्टि दी।

इसके अतिरिक्त, वेदमूर्ति तपोनिष्ठ पंडित श्रीराम शर्मा आचार्य जी की तपस्थली शांतिकुंज का दिव्य वातावरण मेरे लिए एक तीर्थस्थान जैसा रहा, जहाँ मुझे आत्मिक शांति और प्रेरणा प्राप्त हुई। देव संस्कृति विश्वविद्यालय के मानव चेतना एवं योग विज्ञान विभाग के सभी गुरुजनों का मैं सदैव आभारी रहूँगा, जिन्होंने मुझे शिक्षा और संस्कारों के माध्यम से व्यक्तित्व का विकास करने में सहायता प्रदान की। इन सभी अनुभवों ने मेरे जीवन को समृद्ध और धन्य बना दिया है, और मैं सदैव इस अनमोल समय के लिए कृतज्ञ रहूँगा।

---

Divine experience. Positive transformation in self were observed

---

Dsvv is not university it is a whole universe and all staffs are not teacher he is an saint Dr Chinmay bhैया is very talented and he is my mentor and inspiration motivational person in my life Because of which I am doing a lot of work today and will continue to do Gurudev's work in the future

---

It can't explain in few words.

---

It's was excellent. Learned alot during my time in DSVV. Got lots of life lessons and values.

---

Very good

---

Mujhe dsvv mai padh kr bhut acha laga.. Mujhe bhut kuch sikhne k liye mila

---

I think coming to DSVV was the best decision I made in my life, Grateful for the opportunity to study here and for the guidance of everyone.

---

It's been pleasure complete my degree and getting deep knowledge of my course from dsvv. I will always be thankful to Gurusatta and my teachers who taught me the right path for better future.

By combining professional education with spiritual knowledge, individuals can develop a more well-rounded and fulfilling career while contributing positively to society.

Ati Uttam

It's all Dreamy in my head when I say DSVV. It's a beautiful place to live in everything is just next to perfect in terms of infrastructure and teachers yet there is a lot of favouring going on in some areas also I feel recruitment of the same students who used to study there is not a good idea overall(only a demerit which I found)

Dsvv मे रहना सपना था और वो पूरा भी हुआ.. जीवन जीना सीखा दिया है.. आज जो कुछ भी है वह सब विश्वविद्यालय की देन है... धन्यवाद आभार 🙏

Where I know the essence of life

This College is a transformative blend of independence, intense learning, new friendships, and personal growth, marked by challenges, self-discovery, and lifelong memories.

covid nhi aata to 100 out of 100 baki 95 out of 100

Dsvv is one of the best university. we learnt lots of things and spirituality. Life management class is one of the best class. by this class students can develop their personality.

Learned a lot from dsvv about skills, life management, social, spirituality and many more.

Any combination of 26 alphabets can never explain my wonderful experience.

It was excellent spending time in DSVV for my graduation, got the values of life.  
Amazing experience.

No words to say. It was just an amazing and unforgettable.

Dev Sanskriti Vishwavidyalaya focuses on holistic education, integrating traditional values with modern learning. It emphasizes character development, spiritual growth, and social responsibility, providing a unique environment for students to grow academically and personally.

Best experience ever I have ever had. From Good Morning to Good Night every sec was memorable for lifetime.

Excellent

It was excellent

I had a really good experience in DSVV. I have learnt many things from the inside environment and surroundings of the university. I got to learn more about spirituality And prosperity that our culture holds. Not only in the class but I have experienced positivity in each and every moments of events in this university.

Dsvv is an institution established not only to study but to develop our personality. My experience in dsvv is both good and bad. I cannot describe it in words. All i can say is it is different but there are some flaws also. I cannot be more thankful to my teachers, HOD, and our PRO VC sir, for shaping us according to the industry.

The golden time of my life..

This university not just teaches about curriculum but also gives you lessons on life management

University with Unique concept,Spiritual knowledge with moral education, overall a devine experience

It is my great fortune that I have been given the opportunity to study in Dev Sanskriti Vishwavidyalaya. I have many great teachers and companions with whom I spent five years of my life in Dev Sanskriti Vishwavidyalaya. I am deeply thankful to all the teachers and companions of Dev Sanskriti Vishwavidyalaya you have taught me a lot and that experience, that education, is helping me in my life today. Thank you from the bottom of my heart for everything.

I felt like I was with my family.I got great learnings and experiences.

In one line 'I am proud to be a dsvvian.'

DSVV is Heaven on Earth when it comes to teaching not only academics but real life lessons. I cannot imagine any better place to study. The divinity flows everywhere because of Subtle presence of Gurudev and Mata ji.

Life changing Spiritual educational experience.

Dsvv changed my whole perspective towards life, i practice gratitude since after coming from dsvv i am applying the learning which i received from there.

Teachers were really helpful in every matter. Environment was nice and supportive. Got to learn so many things that is useful not only in my career but in personal life as well. Just one thing that really bothers me is that there were literally so less practical knowledge we could gain.like we were doing honours so we should have gotten the chance to learn various disciplines of environment through practicals and field trainings. My overall experience was amazing.and that social internship really boosted my confidence and made me happy.

It was a once in a life time experience. The human being i am today,its just because of the DSVV. I feel privileged to be a part of dsvv community.

Can't describe in words, Best place with best environment to study with all facilities and with spritual environment, very rare , I think I am the luckiest person in this world that I got opportunity to spend my life in DSVV.

All good. It is good place to do sadhana. Teachers are kind hearted.

Overall good

Education experience was good, but other than that was excellent environment, rules,all process of living etc.

Studying in DSVV was a very good experience for me, the best one is environment. There are many places to study but DSVV itself is a place where student can learn moral values and Indian values along with studies.

Good environment

DSVV is a life guide and guard for me. Learned a lot during that period along with degree.

Nice

My experience at the university has been enriching, fostering both spiritual growth and life management skills. The supportive community and resources encouraged introspection and balance, helping me thrive academically and personally

---

Inexplicable Experience

---

What a university very nice

---

Dsvv is a place whereas I feel very positivity all around. All the facilities are always dedicated towards institution and students, I get so much knowledge and love here and I'm missing everyday my DSVV.

---

I like this university the most because here, along with studies, spirituality is also taught, which is not there in normal universities. And here, more than all the teachers, the teachers treat us like their guardians, who make us learn like a family. So, if I get a chance again, then yes, I would like to study here again.

---

Good experience....I learnt many things in my study time...

---

During my academic period in DSVV, I felt like it was my second home, the atmosphere there is no less than heaven, I had a very good experience with everyone

---

DSVV is like my another mother and I learn so many things from that university I am glad that I am a part of Gurudev's family

---

Good and food not good change must menu

---

Impressive , Learn the real meaning of life.

---

Dsvv experience was very nice. Good learning experience ideas in my skills that's why my experience are very good.

---

It was great experience. A perfect mixture and combination of course and in life experiences. Good learning material and courses and special a will of teachers to put efforts personally to individual students, that's much more appreciable. A great mixture of divineness and scientific spirituality. A great move to make peoples to a good and worthy 'Human Beings'.

---

My overall experience studying at DSVV was a good. The discipline we were taught in DSVV is like nowhere else. It's not even taught, it comes naturally maybe due to the sacred atmosphere. I really want to thank my teachers and professors for all the valuable lessons they provided in both the domain of computer science and life.

---

It is fantastic experience in dsvv

---

The divine environment of dsvv completely change my life style . Learned a lot of things from our great teachers.

---

I learnt everything in DSVV specially how to live.

---

Verd good experience

---

My experience of studying in DSVV has left an indelible mark on my life. I not only gained valuable academic knowledge but also underwent personal development in the divine atmosphere of this institution. It empowered me to explore my creativity, become a better human being, and form meaningful connections with those around me.

---

good

---

my experience at DSVV was a valuable one. The university's unique approach to education helped me develop a holistic understanding of the world and equipped me with the skills and values needed to succeed in life.

---

My overall experience was very good in DSVV...i improved a lot with so many things..

---

---

It is a very good place to study because along with studies we also do physical and spiritual studies.

---

Good place in the world

---

It was great, discipline lifestyle, healthy food, extra curricular activities. Full time engagement. Many things to learn apart from own subject. Environment supporting for holistic growth.

---

The Place of Inner and External Transformation is DSVV. The system best for inner engineering and potential discovery of one's personality.

---

Enjoy and learn techniques alongwith cultural values.

---

Studying at DSVV has been one of the greatest blessings of my life. Here I not only studied my Course related subjects(which often happen in other Universities), but also learned about the qualities necessary for building a life and especially for the development of our personality. I really liked the Life Management class within the curriculum.

Presently I am preparing for civil services examination. I had received good information about this examination while studying in the University itself, the benefits of which I am still benefiting from. For this I want to thank all the teachers very much for there valuable guidance.

The class on Gita and meditation of the respected Chancellor Sir and the class of the Pro Vice Chancellor Respected Dr Chinmay Pandya Sir, have had a deep impact on my life. I again thank to all the teachers from the bottom of my heart that they inspired us to move forward strongly towards life and towards our life goals.

Thanks

Pranam

---

It is a wonderful university to study. A modern gurukul that connects us with true roots. A university with a difference

---

One of the great things about university is the diversity of the student body. There are students from all different backgrounds and cultures, with a wide range of experiences and perspectives.

The organization in turn taught me the importance of serving others and created in me the habit of helping others. This habit started at university continues till today.

---

My experience in DSVV was very wonderful. Teachers were very helping and they did every possible things to teach as in the best way they can along with this vibe of DSVV is very good. Hostels are clean warden helps us 24x7.

---

It was a life changing experience for me. DSVV gave a second home like experience as it had a loving, disciplined and protected environment. I learnt numerous life skills and values which I am still applying. I don't have words to thank the teachers for such a tremendous support.

---

Amazing experience and gratitude to all teachers and Department

---

DSVV being my dream University offered us ( the students) with a perfect physical, cultural and spiritual environment to learn and grow holistically ( with sessions on Geeta by shraddhey ( honourable Chancellor of DSVV ), learned professors as great personalities with grounded nature who supported in all realms of life. Having immense opportunities to refine our talents and represent our nation and mother University on foreign lands, also with social internships, got chances to share and serve humanity, my overall experience made me feel my University like my home. I am grateful to God, Parampujya Gurudev and vandaniya mataji for everything and for every moment spent in DSVV.

---

---

Apart from academics, the spiritual environment of Dev Sanskriti University is what makes it truly unique. I had the honor of attending Gita and Dhyana (meditation) classes taken by our respected Shradheya Chancellor Sir. These sessions were deeply impactful, allowing me to reflect on my inner self and align my personal values with professional goals. Learning about the Gita's teachings and engaging in meditation practices helped me stay focused, disciplined, and peaceful amidst the challenges of life.

The combination of quality education and spiritual growth provided by the university has been invaluable in my life journey. I am proud to be a part of this esteemed University, which has given me much more than academic excellence. It has offered life lessons that go beyond the classroom. Dev Sanskriti University will always have a special place in my heart for shaping my character and career.

---

It was great, learned lot's of things and specially thanks to our HOD ma'am for helping me whenever i need it.

---

देव संस्कृति विश्वविद्यालय में पढ़ाई करने से मेरी जिंदगी बदल गई मैं अब ज्यादा खुशहाल रहता हूं मुझे जीने की नई उमंग मिली

---

very good experience and I have done my Graduation B.Sc IT and as well as Post Graduation MCA from DSVV and I have Very good experience during session and when we go for a social internship we are learned very new things.

---

Overall experience was great. The knowledge and the life lesson I took in DSVV is helping me so much in current corporate environment which is full of negativity and bad culture. Some of the flaws related to academic I mentioned in the suggestion. Other than that every thing was excellent and I had a really best experience.

---

For me DSVV is janat, Dsvv mai sabse best place h mahakal jo other universities se defferent banta h Dsvv ko

---

I have complete my graduation as well as masters degree in computer science department from Dsvv. Overall the experience was good, activities, group discussion, festival celebration, values, Geeta classes and all.

---

Best and beautiful time spent in Dsvv specially festivals, meditation, dhyana and geeta program.

---

This is the best place for study and spiritual activities.

---

Jo values dsvv me sikhayi jati hain shayad vo aur khi nhi mil sakti

---

It was great experience as a student in dsvv

---

DSVV provides a controlled environment to learn a discipline life. One can get academics and life management together in a campus. The specialized touch of Vichar Kranti Abhiyaan by Guruji and Mataji creates miracles in life.

---

It was good experience

---

Very Good

---

Liked the positive environment and LM classes were really amazing also other facilities were good

---

Dsvv is a mother for me who nature her child in a every aspects.

---

I am proud to be DSVVian.

---

---

If you really want to make this university best university in the world then first of all through doctor Pranav Pandya and Chinmay Pandya outside the campus.

And stop sar pressing your students this is the university you were teachers are married with their students many teachers like Gopal are married with her classmate and this is one example I think more than 80% teachers are in same page.

And the university administration always try to stop meeting boys and girls in the campus and even outside the campus this shows the dirty mentality of Pranav Pandya.

And stop making buildings and buildings top making that beautiful place of forest of concrete there is no need construct more buildings whatever buildings you have try to provide the best education environment to your students but I think now the motive is to become popular to make money this is not what gurdev dreams was

---

The atmosphere is good for a student. Quite a good university if you are a keen learner and know how to recognize when an opportunity presents itself. The guidance of Hon. Pro VC sir is the cherry on top. However, the faculty need to learn to be respectful instead of always being regressive and demeaning. Professionalism is something the entire staff needs to learn from the Ground Zero. Library needs to improve, lacks a lot of books! University is in dire need of faculties with good credentials and teaching experience!

---

Awesome ❤️

---

My experience in DSVV as a computer science student was both challenging and rewarding. I spent a lot of time into coding, algorithms, and projects that pushed me to think critically. Collaborating with classmates on group projects helped me grow both technically and personally. I also engaged in playing and other activities, which helped me think more clearly. Overall, it was a great experience.

---

Give three observations / suggestions to improve the overall teaching - learning experience in your institute

Allow to the companies for campus placement

Experienced teaching staff

Regular feedbacks from students and improvement steps based on these feedbacks can play a vital role.

3 suggestions - use of technology, blind learning, more input of practical aspects

NA

No suggestion from me

1. More field based knowledge like internships in certain courses are necessary. In psychology we can only learn how to execute therapies or about basics of how to do counseling only when we have practical knowledge about that 2. You should also conduct workshops of psychologists who can guide the students about the techniques.

Best experience

Field visits in psychology department, Workshops and training program, Clinical exposure

Create a friendly atmosphere in the college so that everyone can study comfortably.

1) Alumni session offline or online can be encouraged to give a perspective of the challenges the batch can expect after graduating.

2) A focus towards technical, practical knowledge should be given weightage to by organizing certain workshops on the tools related to the field that are in high demand in the industry.

3) A team to connect with the potential hiring companies can be formed just to give an assurance of a head start offered by the university to each and every student who is deserving.

NA

Integrate Experiential Learning: Implement more hands-on projects and real-world applications in the curriculum. This could include internships, field studies, and community service initiatives that allow students to apply theoretical knowledge in practical settings.

Enhance Digital Resources: Expand access to digital learning tools and platforms. Providing a comprehensive online library, e-learning modules, and interactive resources can facilitate self-paced learning and cater to diverse learning styles.

Foster Collaborative Learning: Encourage group projects and peer-to-peer learning activities. Creating study groups or collaborative workshops can enhance critical thinking, communication skills, and foster a sense of community among students.

All faculty members were truly knowledgeable and expert in his/her area. Overall experience was excellent.

1. More outdoor exposure and field visits

2. Resource books in the library

3. Workshops and seminars

1. The current syllabus, although comprehensive, requires periodic updates to reflect the latest trends and best practices in the industry
2. To enhance industrial internships, establish partnerships with tourism Organizations, hotels and travel companies.
3. To complement theoretical knowledge, experiential learning and practical application will be the best if implemented.

The Psychology faculties were not good that we generally expect.

We should teach discipline to students in some innovative way rather than imposing the rules on them ,young generation can be disciplined only through love and logical explanations of rules which are being made, so if we want to have a long lasting effect of discipline in their life then it should not be imposed .We Dsvvian have lack of professionalism so we should work on it and last thing I want to mention is ,we should work in the field of Yoga scientific research as well to come among top universities in yoga like Kaivalya dham and S-VYASA

Provide the open platform for research and training

Thori si freedom mile .

Practical approach should be focused on all subjects.

I think there is lack of staff in administration office.  
Hostel warden should be very polite and Friendly to the student.  
Proper training must be provided to student in management field.  
Social intership should be every year for one month.

There should be more research oriented environment in every field not just in yoga and spirituality

Personalized learning paths and adaptive assessment.

Professional Internships should be made compulsory  
More industry based practical learning should be included

All are perfect, and I am fully satisfied this institute, गुरु की सत्ता में कुछ ग़लत नहीं होता, जो भी है आशीर्वाद है प्रसाद है गुरु का.

My overall learning experience is good

1. Practical learning
2. Job opportunities
3. Professional internship

The level of the course taught was brilliant as a lot was similar in the Masters also. I don't feel quite worthy of any suggestions but would like to request for the on campus placements or any hands-on experiences like practical fields and the internships in some organisations. Else

Nothing like this

teaching and learning is good but their should be ample of copies of the books available for students in the language in which they are comfortable in studying and they should not be worrying and applying effort in tralating the books from one language to their as it causes incontinece as well as waste of time and effort and sometimes even causes confusion in exams as to in which language one must answer the question paper.

1. better teacher. 2. better management 3. give student changes to express themselves. don't do partiality among student

Modern technology and method should be accepted.

विविध विषयों पर सेमिनार और सम्मेलन का आयोजन कराते रहें, जिससे अनुभवी आचार्यों का सान्निध्य प्राप्त होता रहे।

Appoint highly skilled teacher.

Include new books in library.

Develope scientific temperament not only spiritual.

I was in first batch

I think they already improved a lot

I moved In States Since many years not able to visit, so difficult to say

Using technology in the classroom, Practicing reflection & Asking for feedback from students

The variety of teaching methods helped me to understand single concept with variety examples on long run.

Add something from gurukul parampara. because now in the campus everything looks like modern. dev sanskriti means vedic culture, so it's good to do something on it. Makeover the hostile lifestyle and classroom's thoughts according vedic frame.

1. More Practical Exposure

2. Compulsory Internship(s)

3. Real-life examples, case studies and visits to industry where students can learn more about the subject as it is based mostly on that.

Theology Certificate Course should not close.

In terms of DSVV, my suggestions are:

1. Improve industry interaction

2. Involve some case studies in syllabi

Nothing

At my time everything was good and overall development was done.

No There is no suggestion from my side because it was great in every aspects like teaching, curricular activities, food, library, hostel etc.

1. Salary package is to be revised

2. Rule book is to be revised

3. Fee structure is to be revised

No

Industry collaborations,Enhanced infrastructure,cultural diversity (Food), workshops and skill development

Here are three suggestions to improve the teaching-learning experience in your institute:

Increase practical learning opportunities: Provide more hands-on experiences, such as laboratory work, internships, and simulations, to reinforce theoretical knowledge and develop practical skills.

Update teaching methods: Incorporate innovative teaching approaches, such as problem-based learning, case studies, and flipped classrooms, to engage students and make learning more relevant.

Recruit and retain expert teachers: Invest in hiring and retaining qualified faculty members with expertise in their respective fields. Provide ongoing professional development opportunities to ensure that teachers are equipped with the latest teaching methodologies and best practices. Thank you

Professional internships should also be provided to psychology students by the university.

1.Communication

2.Spirituality

3.Environment

1. More theory classes during practicals

2. Guided visit to Sadhna center

3. Option for in campus paid accommodation

1. Good faculty

2. Current curriculum material availability

3. More and more guest lecture

1. Interactive Learning Methods: Encourage the use of more interactive and student-centered teaching approaches, such as group discussions, hands-on activities, and case studies. This would make the learning process more engaging and practical for students.

2. Technological Integration: Incorporating advanced technology like smart classrooms, virtual labs, and e-learning platforms can enhance accessibility to learning materials and make the teaching process more dynamic and efficient.

3. Personalized Student Support: Offering personalized mentoring or one-on-one sessions for students would help address individual learning needs and provide guidance for both academic and personal growth.

Industrial collaboration, entrepreneurship development and promotion of herbal medicine for holistic health management need to be emphasized.

शिक्षण-प्रशिक्षण अनुभव को बेहतर बनाने के लिए तीन महत्वपूर्ण सुझाव निम्नलिखित हैं:

अधिगम में व्यावहारिकता का समावेश: पाठ्यक्रम में अधिक से अधिक व्यावहारिक सत्र, कार्यशालाएं और वास्तविक जीवन से जुड़े अध्ययन शामिल करें। योग विज्ञान जैसे विषयों में विशेष रूप से, सैद्धांतिक ज्ञान के साथ-साथ व्यावहारिक अनुभव छात्रों को अधिक गहराई से जोड़ता है और ज्ञान को वास्तविक जीवन में लागू करने की क्षमता बढ़ाता है।

तकनीक का उपयोग: शिक्षण में डिजिटल प्लेटफार्मों का अधिक उपयोग किया जाए, जैसे कि ऑनलाइन संसाधन, इंटरैक्टिव टूल्स, और वर्चुअल क्लासरूम। इससे पढ़ाई अधिक समृद्ध, सुलभ और छात्रों की विविध अधिगम शैलियों के अनुरूप हो जाएगी।

छात्र प्रतिक्रिया और समर्थन प्रणाली: नियमित रूप से छात्रों से शिक्षण विधियों और पाठ्यक्रम के बारे में प्रतिक्रिया प्राप्त की

जाए और इसे सुधारने के लिए ठोस कदम उठाए जाएं। साथ ही, छात्रों के लिए परामर्श और सहपाठी समर्थन कार्यक्रमों की व्यवस्था की जाए, जिससे उनका समग्र शैक्षिक अनुभव अधिक सकारात्मक और सहयोगपूर्ण हो सके।

Lab setup can be upgraded, Recent papers should be included in the curriculum which have high market value, Placement cell and student exchange program can be encouraged

All Good no need to any changes

Practical learning in all filed is important for overall teaching - learning experience.

Provide professional internship. That was one thing missing during my academic timing.

All okey

No

- Increase industrial partnerships for training, which I think is underway.
- Spare time in between classes for skill enhancement
- Some work on communication skills for the students

1. Industrial Experienced teacher should be there to teach animation course.

2. Improvement in Placement Drive is needed.

3. Can add a diploma course for Motion Graphics and Graphic Designing.

All Good!

ALL GOOD

Teaching and learning was good this place brought out the best version of me which I did not know existed.. I got a lot support from my teachers like Pankaj sir(The best in Tourism dept.) Avanendu sir Monika ma'am and Ajay sir

योग की प्रायोगिक कक्षाओं में और ध्यान दिया जाये और बाहर जब विद्यार्थी जाये तो उन्हें जॉब में दिक्कते न आये या ग्रेजुएशन और मास्टर डिग्री करने के बाद किसी बच्चे को YTTC कोर्स करने की जरूरत ना पड़े ऐसा कुछ पढ़ाई के साथ बाहर जॉब के लिए भी तैयारी पहले से हो और alumini जो है उन्हें बिच बिच में dsvv बुलाया जाये या ऑनलाइन intraction करवाई जाये और उनके जॉब एक्सपीरियंस पूछा जाये.. धन्यवाद 🙏

Everything was great

There are no such type of suggestions in this field.  
College's teacher and staff are already give their best to the students and overall campus .  
People can Improve personal and their education environment.

- 1) improve food quality in mase
- 2) in my view, there is a lot of misuse of paper in university so all the administration work should be done in digital format. so we save more paper.
- 3) There is a shortage of good teachers in the universities. Many teachers will talk about everything except studies, but do not give much importance to the syllabus. it is very good to talk on all the topic but not all time some time syllabus was also important.

Everything is good

I thought all things already improved.  
Thank you

Increase more practical class.
N/A
No suggestions
Industry Collaboration: Establish partnerships with travel agencies, tourism boards, and hospitality businesses for internships and real-world projects.
Skill Development Workshops: Introduce workshops focused on essential skills such as digital marketing, customer service, and sustainable tourism practices.
Soft Skills Training: Provide training in communication, negotiation, and problem-solving skills vital for the industry.
Career Services: Enhance career services to provide personalized job placement support and resume workshops.
I am unable to find any flaws in teaching experience or facilities. One thing I can suggest is to always investigate about any issues or problem with students before taking actions against the. Until final investigation "gentle" reminder is enough.
All is well
Should improve teaching facilities and other activities
We should consider more of practical knowledge(how does the tourism industry works) than the same periodic pattern .
Hostel accommodation can be improved. Rather than relying on ppt, interesting teaching techniques can be improved. Some practical experiences and freedom should be given in department like jmc, in which students are allowed to do anchoring and reporting on various issues in and out of campus for on-site practical experience.
All the things are perfect..
NA
In yoga, lack of practical yoga teacher university must have modern yoga teachers for practical like for , ashtanga , power yoga , yoga with props with belt and blocks , because after passing the course, we have to do teacher training course for modern yoga practical knowledge
1. Apart from traditional yoga, rhythmic yoga and artistic yoga should also be included in the course. 2. Apart from books, children should also be told about yoga through video lectures and outdoor visiting.
1.Classes should be compact and should start in morning and end upto afternoon so that students who want to self study can do it. 2.Course should be skill based and practical based with industrial environment. 3.My teachers were very supportive.
No suggestions
Mind goes Blank when any suggestions are sought from your Guiding University which is beacon for

me

1. Teaching staff must be NET/JRF
2. For Computer science courses Lab access needs to be available for more hours.
3. Industry Partnerships for exposure and skill development inline with industry requirements.

There shouldn't be any bias between student depending upon favouritism.

My Department is on hiatus right now. But if it's going to start again then, There should be inclusion of field training and more practical knowledge related to environment. Like ecological surveys, Water quality analysis of river ganga, Visit to near natural spaces, Like national parks and sanctuary. Because that would help students to understand the nature of there subject rather than just gaining the theoretical knowledge.

There could be a 3-4 month internship program in a hospital, or mental health center. Theoretical knowledge is good, but practical knowledge is what, which is required to understand that theory. So by collaboration with other mental health centre and a compulsory last semester internship would be great.

1. Mobile should not be allowed, 2. Should have a strict dress code, no western or jeans should be allowed, 3. Yog, dhyana, yoga should be compulsory.

1. Internet or wifi facility in whole campus Otherwise students will not be able to compete this AI world.
2. Good experienced faculty is required which is lacking now.
3. Implementation on Feedback of current Students

Nothing

- 1) Teaching methods of professors
- 2 make less force to students to do anything
- 3 change library system

More practical according to courses

Provide best campus placement to the students after completing their course...

Well in gaps of 14 years I saw many changes and improvements over there so now on words no words for the same. But yes I liked the compulsory internship. We learn a lot from that time of period that should be continued as well that's it

More Practical work should be given. And in which situation the particular knowledge can be used should be taught to.

Enhanced Interactivity: Incorporate more interactive teaching methods, such as group discussions and hands-on projects, to engage students actively and encourage collaboration.

Diverse Learning Resources: Expand access to a variety of learning materials, including online resources, workshops, and guest lectures, to cater to different learning styles and interests.

Feedback Mechanism: Implement a regular feedback system where students can share their thoughts on teaching methods and course content, fostering an open dialogue that can lead to continuous improvement.

1. Industrial visit, placement, mock interviews sessions

No all good

My observations here's

- 1 People give attention to all.
- 2 Spirituality, love and knowledge for all.
- 3 everything was scheduled for everyday.

None

All teaching faculty are best in my education period ..

In my opinion i think there is little need of improvement in teaching staff

Second thing i felt that in dsVV there are some restrictions over technology like smartphone which have to be removed.

And main thing the food....

1. More and more projects
2. And get hire from campus placement
3. Try to more focus on practical knowledge rather than thouritical one
- 4 focus on coding section and try to make students job ready because all they need a good job

Upgrade systsam

Needed more High skilled professional teachers as department wise , also need to improve some management quality.

Mess food,  
Study time table,  
Good faculty .

1) Industry crises needs to discuss with students and make them understand their vital competition positions.

2) Try to make them connect with their seniors working in industry, for better learning and arrange guest lecturers for same.

3) Try to Initiate Learning regarding AI in animation industry and their uses in future.

1. BCA couse could be improved by focusing more on practical hands on experience.
2. Students should be exposed to the vast scope of computer science beyond just SW and web development and coding. Not all students are coding enthusiasts and many struggle to keep pace with the demands of development work. For those students alternative fields such as system administration, UI/UX design, information security software testing and many more should also be emphasized.
3. During my time at DSVV, the use of laptops was kind of frowned upon. It should be encouraged. Encouraging students to work on IT-related projects should be mandatory, as it will provide essential practical experience in their field of interest.  
Lastly, there should be screening of students during their admission to find out if the student has respect for the environment and ethics of Shantikunj and DSVV. Because I have experienced multiple times when new students get influenced by the wrong friends/seniors and becomes like them since they

have a very little knowledge about the right and wrong.

I have no words, because dsVV is heaven

No

I'm not aware of current teaching patterns of DSVV so I can't suggest anything.

But yes generally we need trainings by the time to improve our skills so that our efforts, done in various fields can be relevant.

Thank you

No

Although everything is going great with teaching, I suggest incorporating more practical fieldwork projects for students. Additionally, monthly visits to outdoor locations for work exercises would be beneficial. Lastly, arranging an alumni meetup similar to a festival for students to gather and learn from the experiences of former students would be highly beneficial.

nice

1. Life Management Class

2. Team work (सामुहिक श्रमदान- उत्सव, उन्नयन )

3. ज्ञान दीक्षा

1. It would be great if professors take classes.

2. It would be great if more books available about Yoga philosophy and physiology in library.

3. Department needs to organise few educational tour for students.It will be more helpful in learning.

Practice working with a industry

To prepare the students for study material at competitive level

Though it been long time I have completed my masters. Few more lectures of jitendra sir and Dr saheb. Please change the warden who was sandeep sir's wife that time. She is good for nothing. Remove the yellow dress for teachers and staff. More professional professors are needed compare to related to mission only.

1. In CS field exposure is must.

2. Hackathons and Coding events shall be must.

3. Categorization of students on different CS skills, like Coding, Designing, technical content writing so that they can enhance their specific skills rather than being and all rounder.

More Practical

Subject Experts Faculty would be better

More effective teaching style should be improve

...

Placement of students in high focus

1. Implement more interactive and engaging teaching methods, such as group discussions, hands-on activities, and multimedia presentations, to keep students actively involved in the learning process.

2. Provide regular and constructive feedback to students to help them understand their progress and where they need to improve, and to guide them in the right direction for their future learning.

3. Encourage open communication between teachers and students, and create a positive and supportive learning environment that fosters collaboration and creativity.

Should opt Better internship options it makes easy for students to get job along with this students will made their connections in respective field that will help them in future.

It is already perfect.

All fine

E-learning, research based content of syllabus and educational tours, Certainty of classes and sessions.

1) Industry Interaction: Introducing more guest lectures and workshops by media professionals can help bridge the gap between academic learning and the ever-evolving media industry.

2) Digital Media Integration: With the growing importance of digital media, incorporating more advanced courses on new media, content production, and digital journalism would greatly benefit students.

3) Alumni Network Engagement: Establishing a strong alumni network can provide current students with mentorship opportunities, industry insights, and career guidance.

It would be better if we will provide campus placement with good companies. i.e- companies which is registered and provide salary in employees bank account not in cash like which i had joined.

Don't do one guest lecture on any new topic if you really want to do it, then atleast provide 3-4 good sessions otherwise everything get messed in one sessions like in past expert's tries to bindup everything in 1 or 2 hr and it made things worse.

Giving ppt of any topic feels boring when i was student but now i understand what it built and how it helped me a lot in so many ways so i will suggest give give more ppt to current students and if possible sometimes share students with other departments and prepare students for inter departmental presentation of diff. Topics.

मारकंडे हॉस्टल के तर्ज पर पाणिनी हॉस्टल का भी विकास किया जाए

Please provide campus placement and provide proper classes.

1. Fixed time of classes. ( will save student's wating time in productive things)

2. Availability of faculties on that class time.

3. More practical approach of learning need to be followed ( for eg. Projects should be in every semester so that student could apply the knowledge in more industry oriented way like building website and app rather than only writing some programs)

Staff salary increase kare bcoz kam salary k karn faculty other options search Kari h or acha staff other universities mai jate h, salary package acha hoga to or achi faculty ayegi jisse student ko best staff mil sake

As in computer science department, Mainly focused on skills , communication and language that help the students to get the job ,so they can not struggle.

Need of inclusion of job ready professional courses

-There should be some knowledgeable teachers in Animation department as there is very few. Apart from this I think everything is great in DSVV.

Other courses bhi launch hone chahiye  
Seat capacity badhayi jaye taki jyada se jyada bachhe labhanvit ho sake

N/A

To enhance student-centric learning, Collaborate practical work or assignments, Medical facilities. Alumni network benefits for student grooming.

Improve some class discussion

1. Looking for few more Psychological scales in library
- 2.Few workshops

There is a need to change the favouritism from teachers side as it becomes very unfair for other students

Yoga practical should be more advanced and scientific. Different forms of yoga should be there.

- 1.Improve Campus selection facility.
- 2.Increase more department of MBA like finance, HR, Marketing

Appoint some qualified teachers if them better salary so they can guide the students throughout their graduation master journey whatever professors and staff are available right now in University they all are spending that time till they are not getting any better opportunity outside once they get the better opportunity outside they will kick this university without any other thought

1. Need of faculties (with good teaching experience, tech savvy, and good credentials)
2. Well equipped smart classrooms with teachers who know how to make an ample use of them
3. Curriculum/syllabus needs major improvement, and teaching should be more innovative to make it less monotonous and boring (like it is in our university)

Lyfchanging

1. Engage in more hands-on projects and internships to apply theoretical knowledge to real-world problems and develop practical skills.
2. Go beyond the curriculum by exploring new technologies, participating in hackathons, and joining clubs or online communities to broaden your skill set.
3. Stay updated on the latest industry trends by attending workshops, guest lectures, and certifications to acquire in-demand skills and gain industry insights.
